PERSONAL USE FUELWOOD PERMIT REQUIREMENTS

Any violation of this permit renders the permit void and may result in confiscation of wood and termination of any future right to cut firewood on state forest land.

A Personal Use Fuelwood Permit (PR4166-2) must be obtained before cutting or removing any firewood (except for campfire wood used for personal and immediate use). Personal Use Fuelwood Permits are valid for a maximum of ninety (90) days.

The following requirements must be met:

1. Firewood removed under a Fuelwood Permit must be for **personal use only** and is **not to be sold or traded**. Fuelwood permits are limited to **one (1) per household per year and are non-transferable**.
2. State forest land is intermingled with private land and it is the Permittee's responsibility to ensure that any wood that is cut and/or removed is **ONLY** from the designated locations on state forest land and **ONLY** from within the assigned permit area. It is also the Permittee's responsibility to obtain and use a good map if unfamiliar with the area.
3. A signed Permit must be in the possession of the Permittee and the Permittee must be on site when cutting or in the vehicle when transporting. The Fuelwood Permit (PR4166-2) allows for the removal of up to five (5) standard cords of wood. A standard cord of wood is a pile of wood with dimensions of 4'x4'x8'.
4. The Permittee:
 - a. Must protect surrounding trees from injury;
 - b. Should not block roads or trails with vehicles or downed wood;
 - c. Must use only established roads – **no off-road use of vehicles is permitted**;
 - d. Must not create new roads or trails;
 - e. May use a wheelbarrow or handcart off-road;
 - f. Should start cutting when the permit is purchased.
5. Clean up behind yourself and make certain that you leave no litter.
6. Safety and Other Suggestions:
 - a. It is suggested that leather gloves, heavy leather boots, safety chaps, safety glasses, ear protection, and a hard hat be used at a minimum for personal protection;
 - b. Be careful during saw fueling to avoid spilling gas. Serious explosions and disabling burns have occurred to operators restarting saws after refueling spills;
 - c. Smoke only in a vehicle or on sand roads and carefully extinguish smoking materials to avoid starting wildfires;
 - d. Cut and split no more wood than can be hauled at one time as wood left on site might be collected by another permittee;
 - e. Share the woods. It may be unsafe and disruptive to cut firewood during firearm hunting seasons. Please be respectful of other forest visitors and take necessary safety precautions.
7. Wood may **not** be removed under the Fuelwood Permit from:
 - a. Active commercial timber sale areas. These areas may look just like any other wooded state land, but are bordered by red and/or blue painted trees;
 - b. Any stacked pile of pulpwood, cordwood or sawlogs;
 - c. Within a ¼ mile of a campground or other developed recreation area;
 - d. Within two-hundred feet of any lake, stream, or river;
 - e. Sites posted as closed.
8. General Area Permit: **Remove only dead and down material within 200 feet of a road**. Trees or logging residue must be dead AND separated from the stump. No standing trees, alive or dead, may be cut under a general permit.
9. This fuelwood permit may be in a high-risk Oak Wilt area. Only oak tree species that have loose bark (dead for more than one (1) year) may be cut or taken under this permit.
10. A person who does not follow the requirements of the Fuelwood Permit may be in violation of the State Land Rules (**Section 504 of 1994 PA 451 MCL 324.504**). Any person in violation of a Rule may be charged with a state civil infraction and may be ordered to pay a civil fine of not more than \$500.00.
