National Boating Accident Investigation and Analysis Course: Level I Comprehensive

The Level I Comprehensive Course will provide investigating officers with all the tools they need to completely and accurately investigate a recreational boating accident by study in the following areas;

- Accidents and statistics
- Standards and regulations
- Fuel, ventilation, and electrical systems
- Ignition protection
- Carbon monoxide
- Fires and explosions
- Vessel construction
- Vessel stability
- Navigation lights

Additionally, the comprehensive course will cover investigative procedures, forensic photography, diagramming, and an in-depth study of collisions (operational and collision dynamics, damage assessment, and injury assessment, and analysis of the evidence).
