

# Scouts' Earth Day Project

Scouts from Cub Scout packs 212, 111, 711, and 286, along with Boy Scout Troops 368, 111, 219, 114, and 212 from the Tall Pines Council descended on the Holly Recreation Area for an earth day project. Working with the organization Hiking Michigan, the scouts improved the park's trails and worked on removing garlic mustard, an invasive species. The cub scouts working on the [garlic mustard](#) filled over 30 composting bags with plants they removed. In all, the scouts put in well over 200 hours of community service to the Department.
