MEMORANDUM TO THE NATURAL RESOURCES COMMISSION

Subject: Fisheries Order 206.22
Special Fishing Regulations for Warmwater Species on Select Waters

Authority:

The Natural Resources and Environmental Protection Act, 1994 PA 451, authorizes the Director and the Commission to issue orders to regulate the taking of fish in the waters of this state.

Discussion and Background:

Fisheries Order 206 covers fishing regulations for warmwater species on select waters. The Department is recommending three changes for the order including the removal of one water from a special northern pike regulation and extending the fishing season on two waters listed in the order.

The Department proposes removing Silver Lake in Oceana County from the list of waters where up to five northern pike, with no more than one 24 inches or greater, may be retained in the daily possession limit. In 2004, this water was added to the more liberalized northern pike regulation after surveys documented a slow-growing stunted northern pike population. A survey was conducted in 2019 and only two northern pike were collected; therefore, managers are recommending that the more liberalized northern pike possession limit regulation be removed. This will result in placing the lake under the statewide regulation of two northern pike allowed per day with a minimum size limit of 24 inches, and this recommended change will provide additionally protections for the northern pike population.

The Department recommends extending the fishing season in Jones Lake and Wakeley Lake in Crawford County to increase angling opportunities. Both lakes are currently under special fishing regulations that restrict harvest, allows use of only artificial lures, and each lake has a shortened fishing season. Jones Lake is open to fishing from June 15 through August 31, while Wakeley Lake is open to fishing from June 1 through September 30. The Department recommends changing the fishing seasons in both waters to be open from the last Saturday in April through September 30. The changes will make fishing regulations uniform for both of these special waters while also increasing fishing opportunities.

The Management Units conducted Coffee and Conversations online meetings in April to present the regulation changes to the public and the proposals were fully supported. The regulation proposals were also presented at the Coldwater Resources Steering Committee in May, and the committee was also supportive of the changes.

Issue Pros and Cons

Removal of more liberal fishing regulations will benefit the resource by adding needed protections from exploitation. Extending fishing seasons will increase angler opportunities while not being detrimental to the resource because of the protective gear and harvest regulations in place.

Biological

Recent survey information indicated that the northern pike abundance in Silver Lake was very low. Therefore, maintaining the liberal possession and size limit regulations on that water was no longer prudent management. The statewide northern pike regulations will result in greater protection for the limited population. Lengthening the fishing season by several weeks will expand fishing opportunities on two waters under restrictive use on gear and where harvest is restricted. The special regulations were put in place to protect fish to grow to larger sizes and provide special fishing opportunities to catch some larger sized fish. Extending the fishing season will benefit angling and should not have any effect on the population.

Social

Anglers understand that fishing regulations can be changed to increase opportunities and when greater protection to the resource is necessary. Anglers are supportive of special fishing regulations enacted to protect unique and high-quality fishing populations which provide diverse public fishing opportunities.

Economic

The Department does not expect the proposed changes to have any significant budgetary or personnel implications.

Recommendation:

Relevant Divisions have contributed to the preparation of this order. This order was submitted for information on October 14, 2021, at the Natural Resources Commission meeting. This item appeared on the Department's October 5, 2021, and November 1, 2021, calendars and may be eligible for approval on November 10, 2021.
