

Trees provide material for products you use every day. Once a tree has changed shape and becomes a product, it's easy to forget that it once was a tree. The tree may be used as solid wood, fibers, chemicals, lignin (nature's glue that holds wood fibers together) or fillers and bases for various day-to-day items. Here's a list of items that rely on trees or tree derivatives for their production:

Acetone	Caulking compounds	Feed bins	Knife handles	Pipe racks	Stage sets
Activated carbon	Ceiling tiles	Fence posts	Lacquer	Pipes	Stairways
Adhesives	Ceiling timbers	Fencing	Lacrosse rackets	Planters	Stationery
Agricultural chemicals	Cellophane	Fertilizer	Laxative	Plaques	Steering wheels
