NRTH PHASE 2 – LONG RANGE ACTION GOALS

INTRODUCTION

A General Management Plan develops as a result of a series of planning steps. Each step builds upon the previous, and action decisions focus on the mission of the Recreation Division (RD), and the specific Purpose and Significance of the park. Phase I GMP is the first of four phases of planning. This document, Phase 2 Action Plan, is directed by the Phase 1 plan and identifies goals to be obtained over the next ten years.

In this phase, the first action is to re-evaluate the General Management Plan to assure that no conditions have changed that would cause a change in the overall guiding document. Having recently adopted the General Management Plan for this park in 2008, it stands as written.

The second phase of management planning for Negwegon State Park establishes long-range action goals for each of the management zones defined in the “General Management Plan” (GMP). For each management zone in the plan, action goals are recommended that address the following categories:

- Natural Resources
- Historic/Cultural Resources
- Recreation Opportunities
- Education/Interpretation Opportunities
- Management Focus
- Visitor Experience
- Development

Negwegon State Park

BACKGROUND OF NEGWEGON STATE PARK AND OVERVIEW OF PHASE 1

Negwegon State Park is a 3,738-acre State Park on Lake Huron, located in Alcona and Alpena Counties. The Recreation Division (RD) completed the Phase I General Management Plan (GMP) process for Negwegon State Park in 2008. The endeavor represents a new planning philosophy of the RD. “Management Planning,” a comprehensive, resource-based process, is the RD’s adaptation of National Park Service planning methodology. Through the planning process, the Planning Team (made up of DNRE Department staff, government officials, stakeholders and the public), the Core Values for Negwegon were developed. Negwegon was determined to be significant for the following reasons:

1. Undisturbed habitats, including gentle undulations of the wooded dune-swale complex, lowland hardwoods, and a variety of upland forest types.
2. Location within the Lake Huron Flyway (State and Federal agencies use the bird census data from this area as a litmus test of the health of Lake Huron and the shoreline environment).
3. A habitat for species of special concern, threatened species and endangered species, such as Pitcher’s thistle, Bald Eagles and Blanding’s turtles.

NRTH PHASE 2 – LONG RANGE ACTION GOALS

4. It is part of a greater natural resource system as a forested coastal area, which offers a habitat that supports a great diversity of flora and fauna.
5. It has exceptional value in terms of commercial fisheries, which are also significant from a historical perspective.
6. Sandy beaches that are novel along the typically cobbled Lake Huron shoreline.
7. Recreation opportunities: Hiking and kayaking are available at Negwegon along the Lake Huron coastline.
8. Hunting opportunities.
9. Unique cultural and historic resources (Native American artifacts, farmstead remnants, and shipwrecks).
10. It is part of several regional networks.

In concert with this analysis of Negwegon, the Planning Team, with stakeholder and public input, established appropriate Management Zones and their extent of influence on the Park. From a pallet of nine standard zones, three were applied to Negwegon. While the full descriptions of these zones are included in the Phase 1 document, a condensed review of the Management Zones follows:

- o Primitive Zone reflects a desired condition that emphasizes the natural resources. Land is managed to only allow dispersed and low frequency use for low impact recreational purposes. The majority of Negwegon land, 3,100 acres, or 83%, is designated Primitive Zone. The designated areas contain undisturbed habitats, wetlands, and sensitive ecosystems.
- o Backcountry Zone emphasizes resource quality over recreation, but allows for modification of the landscape to allow for moderate levels of active recreation uses. Activities that could occur in this zone include hiking trails, hunting and trapping, rustic camping, bicycling and equestrian use, and other complementary uses. Approximately 640 acres, or 17%, of Negwegon land is zoned Backcountry. The zone covers the existing trails; land just behind the shoreline; and the northernmost portion of the park.
- o Cultural Landscape Overlay Zone addresses the overall setting in which is found not only historic structures, but non-structural evidence of the traditions, beliefs, practices, lifeways, arts, crafts and social institutions of any community. The Cultural Landscape Overlay Zone covers all Negwegon land. Native American artifacts, farmstead remnants, a portion of the Old Stagecoach Route, and shipwrecks along its coastal waters are reasons for this designation.

In addition, to the Management Zones, the GMP recommends that other aspects of the Park be considered:

NRTH PHASE 2 – LONG RANGE ACTION GOALS

- Regional Consideration. As described in the Preface of this document, the planning for Negwegon State Park was performed in conjunction with the planning for Thompson’s Harbor State Park and the Rockport Property. The planning effort, supported by a consensus of the Planning Team, resulted in the following concept: Rockport would be established as the central “hub” of the three sites, allowing Negwegon and Thompson’s Harbor to remain in a relatively undisturbed, natural state.
- Access and Parking. Negwegon State Park is accessible by Sand Hill Road. Sand Hill Road is an unpaved road on sandy soil. This makes travel quite difficult during certain times of year. The entrance road to Negwegon State Park, a wide, gravel surface, is a stark contrast to the natural, rustic setting one experiences along Sand Hill Road. Phase I of the Management Plan recommends: Improving the condition of Sand Hill Road; installing signage on Sand Hill Road directing visitors to Negwegon; developing additional points of entry; and creating a design to lessen the visual impact between Sand Hill Road and the Park entrance road.
- Camping. Potential locations for hike-in or kayak-in camping areas are identified on the Management Zone Plan. These sites are located in the Backcountry Zone. The sites would not be on the Lake Huron shoreline, but in close proximity to it.
- Equestrian and Bicycle Use. The trails, including the Old Stagecoach Route and Potawatomie, may allow for equestrian and bicycle use, where appropriate.
- Signage. Appropriate signage is needed to inform the public of the park location. Interpretive, directional and education signage within each park is incorporated in Phase 2.
- Future Purchases. Part of the DNRE’s mission is to acquire lands with unique natural, cultural and historic resources for the purposes of public recreation and education. The Natural Resources Commission approved a dedicated boundary for Negwegon State Park in 2004. The Planning Team’s recommendation for expanding the project boundary is included in this GMP (see Section 2.5). This would make Sand Hill Road the boundary instead of the railroad. Land within the dedicated boundary would be a priority purchase for the DNRE, should the opportunity to purchase and funding become available. Major land purchases would prompt an amendment to this GMP.

NORTH PHASE 2 – LONG RANGE ACTION GOALS

Acronyms used:

- **RD** **Recreation Division**
- **FMD** **Forest Management Division**
- **NAC** **NORTH Advisory Committee**
- **METD** **Marketing, Education, and Technology Division**
- **MNFI** **Michigan Natural Features Inventory**
- **TBNMS** **Thunder Bay National Marine Sanctuary**

These final draft goals were developed based upon input and discussion from the full Planning Team, Stakeholders, and the public.

NEGWEGON STATE PARK

1. General Action Goals (Applies to the whole park)			
Action Goal	Target Date	Program Input From	Responsible Program Position
1. Land acquisition within boundary	On-going	Lands-Management	Lands Manager
2. Prepare a Director's Order to close entire park to snowmobile use (with review of appropriate user group)	1 st Quarter 2011	Park User Group	Park Manager
3. Maintain park open to hunting	On-going	Park	Park Manager
4. Expand NRC boundary per the Phase 1 plan recommendation	2012	Lands-Management	Lands Manager
5. Develop (Phase 1) Stewardship Plan	2014	Stewardship	Stewardship Ecologist
6. Implement (Phase 2) Stewardship Plan for the park	Per Stewardship Plan	Stewardship Park	Park Manager
7. Implement the specific provisions of the Biodiversity Stewardship Plan (BSP)	On-going	Stewardship & Park	Park Manager
8. Develop a cultural resources inventory of the park for interpretation, protection and preservation	2020	Stewardship	Stewardship Cultural Specialist
9. Prepare an Emergency Plan	2011	Park	Park Manager
10. Complete "sign-off" of the Wildfire Plan	2011	Stewardship	Stewardship Ecologist
11. Identify opportunities to improve connectivity within and beyond park boundaries; e.g. opportunities with US 23 Heritage Route	On-going	Planning Park NAC	District Planner

NRTH PHASE 2 – LONG RANGE ACTION GOALS

12. Work with county road commissions, local government units and private landowners to improve access to the park. (Look at <u>all</u> options, not just Sand Hill Trail.)	On-going. Set up joint meeting with county road commissions 1 st Quarter 2010	Planning Park	District Planner
13. Tie into ecotourism plan recommendations	On-going	Operations Park NAC OEMT	Marketing Specialist
14. Review all proposed earthwork activities for potential impact on historic/cultural resources	On-going	Stewardship	Stewardship Cultural Specialist
15. Develop ecotourism concession opportunities	On-going	NAC Park OEMT Resource- Management	Contract Specialist
16. Develop specific interpretation and education opportunities with Thunder Bay National Marine Sanctuary (TBNMS)	On-going	OEMT TBMS Park	OEMT Education Unit
17. Explore and develop revenue generating opportunities that are sustainable	On-going	Program- Services Operations District Park	Funds Specialist
18. Update Natural Features Inventory	2014	MNFI Stewardship	Stewardship Ecologist
19. Develop a master 'Site Development Plan' for the park	2016	Planning	District Planner
20. Monitor progress of Natural Area proposal	On-going	Planning Stewardship	Stewardship Ecologist
21. Dedicate staffing and budget resources to address goals (including partnerships and volunteers as appropriate)	On-going	Program- Services District Park	District Supervisor Park Manager
22. Promote volunteer partnerships to meet resource goals	On-going	Friends NAC Park Stewardship	Park Manager
23. Identify water trail connections (e.g. Blue Water Trails)	On-going	Planning	District Planner
24. Develop a marketing plan for this park based on natural and historic resources found within the park	2015	NAC Operations Park OEMT	Marketing Specialist
25. Update zone plan for new acquisitions	On-going	Planning	Park Management Plan Administrator
26. Develop and conduct monitoring program for archeological resources	Develop by 2015, then On-going	Stewardship	Stewardship Cultural Specialist

NRTH PHASE 2 – LONG RANGE ACTION GOALS

27. Develop efficient review process for appropriate commercial interpretation and recreation opportunities	5 Years after transfer from FMD	OEMT Planning Stewardship Resource- Management Park	Resource Management Unit
28. Develop/improve parking areas at north and south access points	3 rd Quarter 2010	Planning	District Planner

Lake Huron shoreline at Negwegon State Park

RECOMMENDATIONS TO APPROVE

Negwegon SP, Rockport, and Thompson's Harbor SP

Request for Recommendation

From: Curtis, Paul (DNRE)
Sent: Tuesday, September 07, 2010 9:24 AM
To: Ellenwood, Gary (DNRE); Sylvester, Anna; Cheli, Keith; Rife, Troy (DNRE); Mullen, Daniel (DNRE); Paquin, Thomas
Cc: Nardo, Mary (DNRE)
Subject: "Recommendation to Approve" - NRTH PH2 - Long Range Action Goals Plans

All...I' m trying this a different way so that I don' t have to send out a hardcopy for signatures. I need each of you to respond to this e-mail with your response (yes or no) indicating your recommendation that the plan be approved, for:

- (1) Negwegon SP – PH2 Plan
- (2) Rockport – PH2 Plan
- (3) Thompson' s Harbor SP – PH2 Plan

I will make the notation on the second page and include your e-mail recommendations in the appendix for each plan. Please respond no later than Friday, September 24...sooner if you can. Let me know if you have any questions...Paul

NRTH PHASE 2 – LONG RANGE ACTION GOALS

Responses (Rockport and Thompson's Harbor SP)

From: Ellenwood, Gary (DNRE)
Sent: Tuesday, September 14, 2010 9:13 AM
To: Curtis, Paul (DNRE)
Cc: Paquin, Thomas
Subject: RE: "Recommendation to Approve" - NRTH PH2 - Long Range Action Goals Plans
Paul....

The two plans I'm comfortable commenting are Thompson's Harbor and Rockport.

While I agree with the plan scopes and recommendations and give my conditional approval; I feel that in both case's it must be recognized and acknowledged that for either plan to be successful the Division needs to be fiscally committed to making them a reality. I would not endorse the transfer of Rockport from Forest Management Division to Recreation Division unless the funding is in place to make it a viable State Park. Field Staff has shrunk to the point that we can no longer continue to set them up for failure by continuing to give card blanche endorsement of unfunded mandates.

Good plan – but funding is crucial.

Subject: Re: "Recommendation to Approve" – NRTH PH2 – Long Range Action Goals Plans

Paul -

I Recommend Approval of the NRTH Phase 2 - Long Range Action Goals Plans with the following contingencies and observations.

Thompson's Harbor State Park

1. Recreation Division has acquired two 80 acre parcels within the park and the maps should be updated to reflect these additions. The two parcels lie along US 23, east and west of the park's main entry/ exit from US 23.
2. The plan should reflect that there are two cabins within the park now not just one. The 80 acre acquisition west of the entry/ exit along US 23 has a cabin that is now for rent.
3. We need to be clear that additional staff and financial resources will be required to effectively achieve the Long Range Action Goals as outlined.

Rockport Property

1. With the recommendation of administrative transfer of the property in 2011 we should also be including additional operational staff and financial resources in order to maintain and manage the existing facility with a commitment to work towards accomplishing the Long Range Action Goals.

Without the required resources it will be difficult to make significant progress as outlined in our NRTH Phase 2 Long Range Action Goals Plans.

NRTH PHASE 2 – LONG RANGE ACTION GOALS

From: Paquin, Thomas (DNRE)

Sent: Wednesday, September 29, 2010 1:32 PM

To: Curtis, Paul (DNRE)

Subject: RE: "Recommendation to Approve" - NRTH PH2 - Long Range Action Goals Plans

Paul,

I concur with what Gary and Keith have stated. No other issues to date.

Tom
