

# Threatened & Endangered Species Week

## Warren Dunes State Park

Tuesday August 5

### **Tree Troubles and Triumphs, 3pm @ Site 83**

How can trees grow on sand dunes? How much does a tree eat? Who is eating the tree? Learn about the trees and the threats to the forest that make Warren Dunes.

Wednesday August 6

### **Rare Birds, 8:30am @ Campsite 83**

Are there rare birds in Warren Dunes? Learn where they are and why they are important. Learn some birding tips.

### **Voles?, 3pm @ Campsite 83**

What is a vole and why can't I find one? Learn about prairie voles and related Michigan mammals.

Thursday August 7

### **Floral Lore and Pitcher's Thistle, 10am @ Campground Office**

Some flowers live only at the dunes. Some are common everywhere. Learn the lore of wildflowers and their role in our dune ecosystem.

### **Mitchell's Satyr and Friends, 3pm @ Floral Ln Parking Lot**

How can a butterfly stop a major highway? Learn about rare insects and ecosystems. We will net and study some insects of the dunes.

Friday August 8

### **Fate of Fish, 5pm @ North Beach Building**

Laugh, cry, and cheer at this melodrama about the Great Lakes, presented by some fishy characters. What lives beyond the swim buoys?

Saturday August 9

### **Long Lost, 5pm @ North Beach Building**

Some animals are so rare they are extinct. We have fossils of them. Learn about them and find some.
