

Monday, May 11, 2020 – IN PERSON SAMPLE DELIVERY RESUMES

The EGLE Laboratory is committed to the health and safety of Michigan’s residents, visitors and laboratory staff. The following changes to drinking water and environmental sample container pickups and sample deliveries at the EGLE Laboratory are effective immediately until Michigan’s ‘Stay Home, Stay Safe’ executive order has been lifted. Visit www.michigan.gov/EGLELab for the most current laboratory information in response to the COVID-19 pandemic.

Sample containers, samples collected for compliance testing under the Safe Drinking Water Act as required by the State of Michigan, and samples collected from state sponsored sampling projects, by personnel deemed essential, may be picked up or delivered in person at the laboratory facility outside the main entrance through call ahead scheduling.

Visitors to the laboratory will not be allowed in the facility at this time to help protect themselves and laboratory personnel against the spread of COVID-19.

Samples may also be mailed or shipped overnight Monday through Thursday.
