## Legislative Report

# Report on Renewing Michigan's Environment Program

Report Period:  
Fiscal Year 2020

Authority:  
Section 51g(5) of 2018 PA 588

### Overview

In December 2018 the Legislature established the Renewing Michigan’s Environment Program through 2018 PA 588. The program is funded by \$69.0 million annually from tax revenue and is to be used for three specific purposes: environmental cleanup and redevelopment (65%), recycling (22%), and waste management (13%).

In fiscal year (FY) 2020 the program was impacted by the global pandemic and the resulting economic slowdown. Several Executive Directives were issued to accommodate the slowdown, causing spending and hiring to be hindered. The programmatic goals for the Renew Michigan Program remain important to the Department of Environment, Great Lakes, and Energy (EGLE) and will work to adjust as the economy recovers.

### Beginning Fund Balance

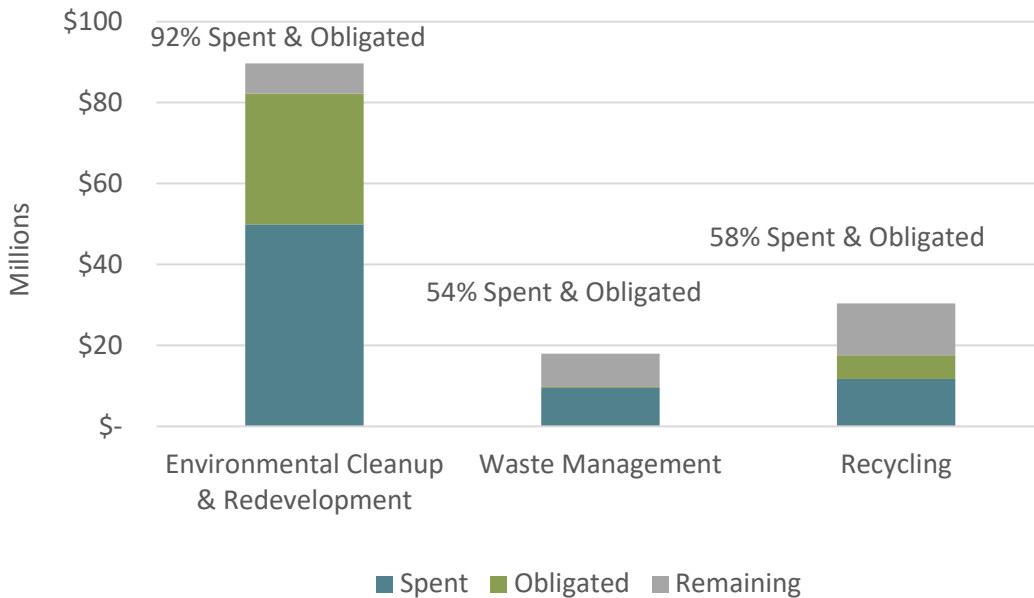

To begin FY 2020 on October 1, 2019, the program had an unobligated fund balance of \$45.0 million, which carried forward from the previous fiscal year.

### Revenues

Since inception, the fund has received a total of \$138.0 million in tax revenue. In FY 2020, \$69.0 million in tax revenue was received in the fund, along with \$558,100 in interest earnings.

### Expenditures

As of September 30, 2020, EGLE has spent and obligated 80%, or \$109.6 million, of the annual allocations of \$138.0 million since its inception in FY 2019.

For FY 2020 only, EGLE spent and obligated \$85.0 million against current and prior year projects that continued into from the prior year.

### Environmental Cleanup and Redevelopment

EGLE has partnered with local agencies to address contamination and implement brownfield redevelopments in over 200 sites across the state. Activities include remediation of sites contaminated with PFAS, water sampling, water analysis, and water monitoring. The map below provides an overview of sites that will be addressed.

Additional detail on the sites can be found in Appendix A or at the following site:  
<https://egle.maps.arcgis.com/apps/Shortlist/index.html?appid=9e2348ccbf30446dbc258541880a258f>

#### Waste Management

Through the waste management allocation, EGLE supported efforts in the solid waste program under Part 115, Solid Waste Management, and in the hazardous waste program under Part 111, Hazardous Waste Management, both within the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended. In addition, staff provided oversight of leachate removal at Richfield Landfill and the demolition of the former Northville Psychiatric Hospital.

#### Recycling

The Renewing Michigan's Environment Program will provide over \$15.0 million in grants to local communities for recycling infrastructure, improvements to the quality of recyclables, market development, and agricultural recycling. A total of \$1.6 million was granted in FY 2020 as outlined in Appendix B.

#### Ending Fund Balance

As of September 30, 2020, the ending unobligated fund balance was \$29.5 million and will be carried forward to FY 2021. The carry forward will be used to finish activities initially started within the Renewing Michigan's Environment Program.

#### Going Forward

EGLE will continue to work closely with local communities to implement and support the program to protect Michigan's environment and public health.
