**Description of Incident** (incl. cleanup efforts, assistance requested, etc.): GASOLINE LEAK INTO PIT AND STORM DRAIN SEWER

MAINTENANCE STAFF WAS WALKING IN THE AREA, PATROLLING TO INVESTIGATE FROM EPA TO SEE IF THERE IS ANYTHING NOTICED RECENTLY. AT 3:25 PM, THEY IDENTIFIED THERE WAS AN ODOR COMING FROM A MAN HOLE COVER OVERTOP OF A PIT, IT IS AN ENCLOSED SPACE. NOT TIED INTO A STORM SEWER, TOTALLY ISOLATED. TURNED OFF THE TANK AND HAD A CONTRACTOR COME OUT TO PUMP OUT THE PIT AND REMOVE THE GASOLINE THAT LEAKED IN THERE. CONTACTED A COMPANY TO COME OUT IN THE MORNING TO REPAIR PIPING. CAME OUT AT 7 AM AND STILL NOTICED SMELL OF GAS, EVEN THOUGH IT WAS REMOVED FROM THE PIT. SMELLED GAS FROM THE STORM DRAIN NEAR THE LOADING PAD NEAR THE PIT. LEAK COMING OUT OF THE PIPING. IN THE INVESTIGATION, SOMEONE HAD TURNED IT BACK ON IN THE MORNING. REASON FOR NOTIFICATION, NO STORM DRAIN CONNECTING THE PIT TO THE STORM DRAIN SEWER. CONCERNED THERE MAY BE GAS LEAKING STILL AND MIGRATING DOWN THE STORM DRAIN. DOES KNOW IT DID NOT MAKE IT OUT TO THE STORM POND, NO SHEEN AND SMELL THERE. ALSO DID NOT DETECT ANY ODOR OR SMELL IN THE SANITARY. STILL INVESTIGATING AND WORKING ON GETTING SOMEONE INTO THE PIT AND ENTER SAFELY TO SEE WHAT IS GOING ON. CAN BE CONTACTED BACK.
