**Michigan Department of Environment, Great Lakes, and Energy**  
**Flint Water Infrastructure Funding**  
**As of August 26, 2020**

In early 2017 the United States Environmental Protection Agency awarded Water Infrastructure Improvements for the Nation (WIIN) Act grant funds of \$100 million. In addition, the city of Flint (City) and State entered into a settlement agreement in late March 2017 to provide additional service line replacement funding. The following table summarizes the \$167 million available for the City to address infrastructure needs. To date, 50% of the funds are remaining.

<b>Total Water Infrastructure Funding \$ 167,019,659 \$ 84,138,804 \$ 82,880,855 50%</b>					

The City reports that 25,935 lines have been excavated and 9,695 lines have been replaced as of August 13, 2020, indicating a 37.3% replacement rate. An average cost per line will be calculated upon completion of work and reimbursement of invoices.

CHIP/DHHS funds were available in fiscal year (FY) 2017, FY 2018, and FY 2019. These funds lapse each year, and as a result, the City was only able to utilize \$10.3 million from this funding source. EGLE issued an amendment increasing the service line replacement grant by \$7.7 million to account for the lapsed CHIP dollars. This amendment is included in the "Service line replacement State" line above.

\* The water quality monitoring project budget has been reduced and is now utilizing City funding. Previous WIIN funds allocated to this project were moved to the water main replacement project.
