Mr. Andy Maloy, Director
EH&S Risk Management
Stericycle Environmental Solutions/PSC
18000 72nd Avenue South, Suite 217
Kent, Washington 98032

Dear Mr. Maloy:

SUBJECT: Review of Corrective Measures Study Work Plan; Petro-Chem Processing Group of Nortru, LLC, Detroit, Wayne County, Michigan; MID 980 615 298

The Michigan Department of Environmental Quality (MDEQ), Office of Waste Management and Radiological Protection (OWMRP), has received the Corrective Measures Study Work Plan (Plan) dated December 23, 2015. The OWMRP has reviewed the Plan for compliance with Conditions I.E. and VI.D. of the Petro-Chem Processing Group of Nortru, LLC (PCPG) hazardous waste management facility operating license (License) effective December 18, 2012, and Part 111, Hazardous Waste Management, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended.

This Plan provides for additional soil borings and monitoring wells for data gaps identified in the October 27, 2015, MDEQ review of the Corrective Action Investigation Report dated February 12, 2015. Based on the review, the OWMRP approves the Plan.

The OWMRP also suggests that Stericycle Environmental Solutions/PSC consider the use of indicator products, such as Oil-In-Soil, for the Non-Aqueous Phase Liquid (NAPL) investigation in order to provide an additional line of evidence for the presence or absence of NAPL.

Should you require further information, please contact me via e-mail at slaytond@michigan.gov; telephone at 517-284-6571; or DEQ, OWMRP, P.O. Box 30241, Lansing, Michigan 48909-7741.

Sincerely,

David Slayton, Acting Unit Chief
Management & Tracking Unit
Hazardous Waste Section
Office of Waste Management and
Radiological Protection
