Sampling Point <input type="checkbox"/> Kitchen <input type="checkbox"/> Bathroom	Kit #
---	-------

Mark where the sample came from - kitchen or bathroom. The kitchen is usually the best place to sample because most people get their drinking and cooking water there.

Questions? Call the Department of Environmental Quality Environmental Assistance Center at **1-800-662-9278**

For Sample drop off sites, bottled water, water filters and free water testing kits go to: www.michigan.gov/flintwater and click on Water Resources or call 1-800-662-9278.

Sample results will be mailed to you and posted on www.michigan.gov/flintwater under Testing Results.

READ THIS BEFORE OPENING YOUR SAMPLE BOTTLES

- Do not use any water in your house for at least six hours before you take a sample.
- The best times to sample are early in the morning or after you return home from work.
- Do not flush any water from the faucet before you take a sample.
- Do not touch the inside of the cap or bottle.
- Only use faucet in the KITCHEN or BATHROOM that is used often for drinking. It should also have been used in the last 24 hours. No other faucet will work for sampling.
- If the faucet is connected to a faucet mount filter, water softener, iron filter, or reverse osmosis system, it must be removed or bypassed.
- To start, open bottles 1 and 2 and set on counter near the sink.

FILL OUT SAMPLE FORM ON THE OTHER SIDE OF THIS PAGE

Place the filled bottles and completed form back into the zip-lock bag and return the kit for testing.
