

Brig. Gen. (ret) Mike McDaniel  
FAST Start Coordinator

10 July 2017

Eric J. Oswald, Director  
Drinking Water and Municipal Assistance Division  
Department of Environmental Quality  
Constitution Hall  
525 W. Allegan Street  
PO Box 30473  
Lansing, MI 48909-7973

Dear Mr. Oswald:

The EPA Lead and Copper Rule, 40 CFR Part 1, at Sec. 141.84(b)(1) provides that a municipality "shall replace annually at least 7 percent of the initial number of lead service lines in its distribution system." That same section provides that an inventory be done to determine the number of lead lines in the city, as it states: "[t]he system shall identify the initial number of lead service lines in its distribution system, including an identification of the portion(s) owned by the system, based on a materials evaluation..."

The City provided a conservative estimate, in accordance with this requirement, of 29,100 lead or lead-contaminated service lines in the City of Flint. This number was believed to be a high estimate, given all factors then known, and is borne out by the almost 20% of the excavated lines which were revealed to be copper-copper, although marked in the city records as either lead, galvanized, or unknown. Based upon the current excavation and replacement efforts, and the hydro-excavation work begun on 5 July for this purpose, the City will be providing a revised number of lead service lines in the near future.

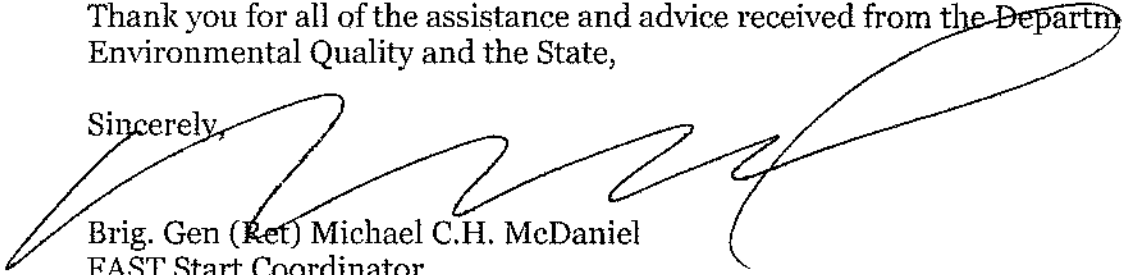

The 7 percent replacement requirement, then, requires that 2,037 of the 29,100 estimates lead or lead-contaminated service lines must be replaced within one year of the "first day following the end of the monitoring period in which the action level was exceeded." The City thus had until 30 June 2017 to replace the 2037 service lines.

I am very pleased to advise, formally, on behalf of the City, that as of 30 June 2017, **the City of Flint has replaced 2,150 service lines**, exceeding the LCR requirement. Please find attached to this letter an Excel spreadsheet listing the addresses where service lines were replaced.

I look forward to continued cooperation and partnership with the Department of Environmental Quality, as we continue towards our common goals of excavation and replacement of all lead and lead-contaminated service lines in the City of Flint, the restoration of clean drinking water, and the health and safety of its citizens.

Thank you for all of the assistance and advice received from the Department of Environmental Quality and the State,

Sincerely,

A large, fluid handwritten signature in black ink, appearing to read 'M. C. H. McDaniel', written over the 'Sincerely,' and extending across the name and title area.

Brig. Gen (Ret) Michael C.H. McDaniel  
FAST Start Coordinator
