

**Summary of City of Flint (City) Actions  
In Response to the  
EPA Emergency Administrative Order  
Updated: February 12, 2016**

Chapter 57 & 58: Adequate Demonstration that chlorine residual is being maintained in the distribution system.

EPA Order Due Date: Monthly

The City continues to monitor chlorine residuals in the distribution system and continues to add corrosion inhibitors in an effort to optimize corrosion control in the system.

The results of the chlorine monitoring, daily water quality parameter monitoring, corrosion inhibitor dosage and corresponding residual are reported as a weekly updated spreadsheet, which can be found on the State of Michigan's "Taking Action on Flint Water" website.

Distribution system weekly water quality parameter results are compiled on a spreadsheet, which can also be found on the State of Michigan's "Taking Action on Flint Water" website.

The results of the monitoring are provided and discussed in a weekly conference call with staff from the Michigan Department of Environmental Quality.
