Using Technology to Improve the Health of Patients with Hypertension and Diabetes

The PROBLEM:

Medical COSTS are **2.3 times HIGHER** for people with **DIABETES**

Nearly **1 in 3 MICHIGAN adults has HYPERTENSION**

HEART DISEASE is the **LEADING** cause of **DEATH** in Michigan

1 in 4 people of all ages has **UNDIAGNOSED DIABETES**

A SOLUTION:

Your Healthcare Provider Can Make the Most of Your Electronic Health Record by:

Providing safer **Medication Review**

Sending **Prescriptions** straight to the pharmacist

Supplying you with appropriate **Education**

Electronic Health Record

Seeing anything **Missing in Your Care**

Sending **Referrals Electronically**

Providing you access via a **Patient Portal**

How Increased Health IT Use Links to Better Outcomes for Patients with Hypertension and Diabetes

The following results are from M-CEITA data analysis conducted in 2017 on Michigan Medicare and Medicaid clinician Quality Measure (2012-2016), Michigan EHR Incentive Program (2012-2016), MiBRFSS (2013-2015), and Michigan hospitalization (2014) data.*
