Important Information Regarding Debit Blocks

Some financial institutions offer a service referred to as "Debit Blocking" or "Debit Filtering" to their business account owners to prevent unauthorized debits (withdrawals) posting to their accounts. If an account has a debit block or filter, any unauthorized debit transaction will be returned unpaid. Most financial institutions offer the option of authorizing certain debits by providing specific information about the transactions to be authorized.

If you have a Debit Block or Filtering service on your account you must access your Debit Block or Filtering settings or contact your financial institution and have the ACH transactions identified with the Company ID **9044030366** authorized to debit your account. Failure to make these arrangements will result in your payment being returned unpaid.

International ACH Transactions (IAT)

Payments processed through this website are intended only for domestic ACH payments not associated with a foreign bank account, which would classify it as an International ACH Transaction (IAT). If your domestic bank account is funded or otherwise associated with a foreign bank account you must pay via an alternate payment.
