Adult-Use Equivalent License Transfer Guidelines for Michigan

In accordance with the Adult-Use Marihuana Establishments Emergency Rules promulgated by the Marijuana Regulatory Agency July 3, 2019, existing medical marihuana facilities may transfer product from their facility to their establishment.

The applicable rule citations are included below.

Rule 40 states the agency may authorize licensees who hold equivalent licenses to transfer marihuana product from the inventory of their marihuana facility to the inventory of their marihuana establishment. This applies if they hold marihuana grower/grower, marihuana processor/processor, or marihuana retailer/provisioning center equivalent licenses.

Rule 40 (3) states that the agency shall publish a specific start date, end date, and other requirements for the transfer of marihuana product between equivalent licenses.

Beginning December 1, 2019:

- **Growers** may transfer not more than 50% of their passed harvest batches from their marihuana facility to their marihuana establishment. All test results must show passed in the statewide monitoring system.

- **Processors** may transfer not more than 50% of their passed finished products from their marihuana facility to their marihuana establishment. All test results must show passed in the statewide monitoring system.

- **Provisioning centers** may transfer not more than 50% of each passed product type (marihuana infused product, marihuana concentrate, buds, etc.) that has been in inventory for a minimum of 30 days to their marihuana retailer. All test results must show passed in the statewide monitoring system.

These transfers may only be made from a medical facility to an adult-use establishment with the **same ownership**. These are standard transfers and will **NOT** have a price associated with them.

The following pages will detail how to compliantly complete the transfers.
Starting on December 1st, 2019 medical facilities will see the new transfer types below available for selection.

Transferring Packages from Medical Facilities to Adult-Use Establishments

The following is guidance with screenshots on how a grow facility will compliantly transfer a package to their marihuana grow establishment.

**Step 1:** Navigate to the “Transfers” area for your medical marihuana licensed facility

![Screenshot of Transfers area](https://example.com/screenshot1.png)

**Step 2:** Select “New Transfer”

![Screenshot of New Transfer option](https://example.com/screenshot2.png)
Step 3: Choose a destination license number

Please note this destination license number **MUST** have the **same ownership**.

Step 4: Choose your corresponding affiliated adult-use establishment to which you are transferring product
Step 5: Select the type of transfer (e.g. Grow to Grow Med to AU)

Please note the Grow to Grow Med to AU transfers are for harvest batch packages.

Step 6: Complete the transfer form with Planned Route, Est Departure and Arrival, and Transporter Information
**Step 7:** Lookup the Package(s) that will be transferred

![Image of the New Licensed Transfer interface showing the lookup of packages](image)

**Step 8:** Choose the Package(s) to be transferred

![Image of the Select interface with a list of packages](image)
Step 9: Enter the Gross Weight

Step 10: Register the Transfer
Receiving the Package from Your Equivalent Marihuana Facility

The following is a step-by-step guide with screenshots for how a marihuana grower establishment would receive a transfer package from their grower facility.

Please note: All medical products will be labeled with the YELLOW METRC package tag when transferred. Once the package has been accepted into the establishment’s inventory, a new BLUE METRC package tag will need to be created, and the package will be labeled with this tag.

Step 1: Select the establishment to which the product was transferred

Step 2: Select the “Transfers”
Step 3: Select “Receive”

Step 4: Select the room for your package

Step 5: Receive the transfer
**Step 6:** Select “Packages”

**Step 7:** Select your newly transferred package and then select “New Package”

**Step 8:** Select “New Tag”
**Step 9:** Choose the tag for your package that is assigned to your adult-use license

![Image of the tag selection interface](image1.png)

**Step 10:** Complete the “New Package” form
(Ensure that you use the entire weight of the package and select the “Finish Package” checkbox.)

![Image of the New Packages interface](image2.png)
Step 11: Select “Create Package”

All adult-use inventory MUST be designated with a BLUE package tag. Your new adult-use package should appear under your “Active” packages, and the package with the YELLOW METRC package tag should be moved to the “Inactive” packages.
