---

## Required Marihuana Testing Points

The purpose of this bulletin is to inform the public, medical marihuana licensees, and adult use marihuana licensees of the Michigan Regulatory Agency's testing requirements of marihuana and marihuana-infused products. Detailed information regarding testing methods and limitations can be found [here](#) in the Safety Compliance Facility Sampling and Testing Information document posted in MRA Technical Bulletins. Facilities may choose to test their products at additional points in the supply chain at any time.

The Agency requires testing of marihuana and marihuana-infused products at the following two points in the supply chain:

- After harvest: Harvested marihuana must pass required tests before it is transferred from a grower to a processor or a provisioning center.
  - Exception: Requests for Live Resin are permitted to allow growers to bypass the initial required tests and submit flash frozen marihuana plant material directly to a processor.
- After processing: Marihuana and marihuana-infused products in their final state must pass required tests before they are transferred from a processor to a provisioning center.

Marihuana flower products that will not be processed into a different product form only require the after harvest compliance testing. Remediated marihuana product must pass the previous failed test on two separate testing instances in order to receive a passed test.

Test results will be recorded in the statewide monitoring system by the licensed safety compliance facility. The grower or processor that provided the test sample will be able to view the testing results in the statewide monitoring system once they have been recorded.

A caregiver may choose to have his or her product tested by a licensed safety compliance facility, but those tests will not be recorded or tracked in the statewide monitoring system

Licensed provisioning centers can sell or transfer marihuana to a registered qualifying patient or registered primary caregiver only after it has been tested and displays the label with the safety compliance facility name where compliance testing was conducted.

Questions can be sent to the Marijuana Regulatory Agency Enforcement Section via email at [MRA-Enforcement@michigan.gov](mailto:MRA-Enforcement@michigan.gov)
