Security and Emergency Response Training Center

## Responding to Incidents Involving Flammable Liquids Transported by Rail (R-FL)

RFL | Mobile Delivery 1-day, 8-hr Course

### Qualify:

Participants will meet the following requirements:

- Remote or volunteer US-based Rural Emergency Responder,
- Located in a city/county with a population of 50,000 or less,
- Non-Federal employee, and
- Certify there is freight rail passing through their jurisdiction.

**Course Description:** Responding to Incidents Involving Flammable Liquids Transported by Rail course. This 8-hour remote site training will be delivered to volunteer and rural area first responders who will be exposed to the potential harm caused by transportation of flammable liquid by rail incidents, so that they can plan to coordinate their responses in an effective and efficient manner. Participants will learn the importance of developing strategies while responding to these rail incidents, which allow them to remain flexible in adjusting their actions to any changing events that may occur during an incident. Key success factors presented in the course will be effective planning, communication, and coordination.

The course is designed to assist local emergency responders to recognize the significant aspects of flammable liquid rail transportation emergencies and the difficulties involved in containing large quantities of the flammable liquid that may be released by an incident as well as mitigating fire incidents that may occur.

Participants will recognize the potential scope of incidents involving flammable liquid transported by rail and the need to identify other agencies and organizations for help in planning and responding to these types of emergencies.

The course meets the requirements of 29 Code of Federal Regulations (CFR) 1910.120(q)(8) and NFPA 472: Standard for Competence of Responders to Hazardous Materials/ Weapons of Mass Destruction Incidents, 2013 edition, supports the National Preparedness Goal of enhancing community core capabilities, and is fully compliant with the National Incident Management System.
