Department Banned Chemical Active Ingredients – Updated

The intent of this technical bulletin is to publish an updated list of banned chemical active ingredients in accordance with the Medical Marijuana Facilities Licensing Act (MMFLA) and the Administrative Rules applicable to safety compliance facilities.

R 333.247

(8) For the purposes of the chemical residue test, the department shall publish a list of acceptable levels. A marijuana sample with a value that exceeds the published acceptable level is considered to be a failed sample. A marijuana sample that is below the acceptable value is considered to be a passing sample.

(12) The department shall publish a list of banned chemical residue active ingredients, the list for acceptable action limits must meet those set forth in legal regulations for tolerances and exemptions for chemical residues in food, 40 CFR part 180, subpart C, or 27 the federal insecticide fungicide, and rodenticide act, 7 USC 136 to 136y, whichever is more stringent.

Since there are no federally recognized and published limits for marijuana in 40 CFR part 180, subpart C, or the federal insecticide fungicide, and rodenticide act, 7 USC 136 to 136y; the department published the below list. The list will be continually evaluated and updated based on available scientific and industry information, or if the federal government adds marijuana to 40 CFR part 180, subpart C, or the federal insecticide fungicide, and rodenticide act, 7 USC 136 to 136y.

All medical marijuana products will be screened for the banned chemical active ingredients in the list below. Any product with a value that exceeds the action limit will result in a failed test for chemical residue.

Use of unauthorized chemical active ingredients and failed chemical residue tests will be referred to the Marijuana Regulatory Agency (MRA) Enforcement Section for investigation and inspection. This may result in sanctions, including, but not limited to, license denial, limitation, fines, revocation, suspension, nonrenewal, administrative holds, and orders to cease operations. In addition, the use of these chemical active ingredients may be a violation of federal and state laws and may be referred to the appropriate authority. The department may issue future chemical active ingredient lists that supersede the information contained in this bulletin.
