

Kentwood Save 2

Good afternoon Kymberly,

I have a couple of things.

First I wanted to let you know, we have had another CO save with alarms FI Quick and I have installed. This one was another elderly woman who had a malfunctioning stove. We had installed an alarm a couple of months prior. That makes four different locations with in the last 6 months. Three were elderly individuals with malfunctioning stoves and one was a family of 5 with a furnace issue. All had high readings of CO when companies responded.

Second, are there any smoke alarms left? We have installed almost all the alarms. I believe we have about 8 left. I was just curious. I am going to work on getting some money for more CO's and Smokes.

Thanks again for all of your work!
