

# PROPANE EMERGENCIES

## TRAINING OPPORTUNITY

**Description:** This eight hour course gives students the technical knowledge and hands-on skills required to response to propane emergencies. It provides an understanding of the chemical and physical properties; use, storage, transportation, and tactics to safely mitigate an emergency involving propane.

**Reviews:** Was a great course. Learned a great deal and would recommend any firefighter to attend. Extremely knowledgeable instructors. Very educational class.

**Dates:** May 20, 2019
