

Boxy Bus

Create a child-sized bus at home!

What you need:

- A cardboard box large enough for your child to sit in comfortably (a box that was originally used for printer paper works well)
- Scissors
- Markers, crayons, paint, or other art supplies (optional)
- One paper plate (optional)

What you do:

1. Remove the lid from the box, or cut away top flaps.
2. Cut windows in the two longer sides of the box, if desired.
3. Decorate the outside of the box like a bus using markers, paint, crayons, or other art supplies. Your child will enjoy helping with this step!
4. Create a steering wheel out of a paper plate. If you like, cut the center out of the plate and decorate the wheel.
5. Encourage your child to sit in the box, grasp the wheel, and drive the bus.
6. If you like, add stuffed animal passengers.
