----------------------	--	-----------------------------------	---------------------------------------	--	-----------------------------------

The purpose of this alliance is to provide enhanced awareness of worker safety and health of members through banners, promotion of training opportunities, and allowing access to member sites for the Consultation Education & Training (CET) Division to conduct job site safety and health consultation visits.

The AGC membership, through their participation in the alliance, will learn how to provide a safer and healthier worksite through the assistance of both the AGC and the MIOSHA CET Division working together in the spirit of cooperation.

### Outreach and Communication:

- AGC will solicit members to voluntarily participate in the alliance job site visits.
- Participating contractors will announce their participation in the alliance by posting a banner at the job site.
- Promotional announcements will be made to promote the alliance through newsletters and website.

### Training and Education:

- Members will be provided with instruction and material on how to develop, implement, or improve their safety and health management system.
- Members will receive information on how to comply with MIOSHA rules and regulations.
- MIOSHA and AGC will work together to advertise and promote training opportunities and conferences.

### Promoting Dialogue:

The AGC will promote the alliance on their website and in their publications. Each participating worksite will promote the alliance by a prominently displayed banner. MIOSHA and the AGC will readily share news article content and contribute to the success of each party's events or conferences.

**SAFETY ALERT**

**This Project is a voluntary participant of the AGC/MIOSHA Alliance to increase Worker Safety and Health Awareness.**

AGC of Michigan sends out weekly Mid-Week Briefings to all members via email. Each Mid-Week Briefing has a safety section that provides information on MIOSHA, OSHA, or safety and health topics. Several times throughout the year the AGC/MIOSHA alliance is discussed in the Mid-Week Briefing.

AGC of Michigan publishes Michigan Constructor magazine. The Michigan Constructor reaches all sizes and types of businesses throughout Michigan. The magazine is mailed to all identified AGC members, affiliated associations, architects, K-12 school districts, intermediate school districts, Michigan universities and colleges, Michigan legislators, county administrators and hospitals.

### Areas of Emphasis:

AGC of Michigan serves the construction professionals of Michigan by fostering and strengthening the key values of skill, integrity and responsibility of those who build Michigan.

The AGC of Michigan is a full service construction trade association providing services to Michigan's leading general contractors, construction managers, specialty contractors and related construction industry companies. A diverse group of Michigan's leading constructors and industry-related firms make the AGC of Michigan the organization of choice for those associated with the construction industry.

In 2007, the Michigan Chapter AGC (founded in 1927) and the AGC, Greater Detroit Chapter (founded in 1916) merged to become the AGC of Michigan. The statewide organization now represents more than 400 members promoting the AGC values of skill, integrity and responsibility.

AGC of Michigan is a proud chapter of the Associated General Contractors of America. AGC of America represents more than 32,000 firms, organized into approximately 100 chapters throughout the fifty states and Puerto Rico, and is recognized as the authority in construction-related issues.
