

DEPARTMENT OF LABOR AND ECONOMIC OPPORTUNITY
DIRECTOR'S OFFICE
GENERAL INDUSTRY SAFETY AND HEALTH STANDARD

Filed with the Secretary of State on December 7, 1990 (as amended April 23, 2001) (as amended March 13, 2013)
(as amended February 22, 2017) **(as amended September 13, 2019)**

These rules become effective immediately upon filing with the secretary of state unless adopted under section 33, 44, or 45a(6) of the administrative procedures act of 1969, 1969 PA 306, MCL 24.233, 24.244, or 24.245a. Rules adopted under these sections become effective 7 days after filing with the secretary of state.

Rules adopted under these sections become effective September 20, 2019.

(By authority conferred on the director of the department of labor and economic opportunity by sections 14, 16, 19, 21, and 24 of the Michigan occupational safety and health act, 1974 PA 154, MCL 408.1014, 408.1016, 408.1019, 408.1021, and 408.1024, and Executive Reorganization Order Nos. 1996-1, 1996-2, 2003-1, 2008-4, 2011-4, and 2019-3, MCL 330.3101, 445.2001, 445.2011, 445.2025, 445.2030, and 125.1998)

R 325.51101, R 325.51105, and R 325.51108 of the Michigan Administrative Code are amended, and R 325.51101a is rescinded, as follows:

GENERAL INDUSTRY SAFETY AND HEALTH STANDARD
PART 301. AIR CONTAMINANTS FOR GENERAL INDUSTRY

Table of Contents:

R 325.51101 Scope.	1	R 325.51108 Tables.	4
R 325.51102 Definitions.....	2	TABLE G-1-A. EXPOSURE LIMITS FOR AIR	
R 325.51103 Exposure limits.....	2	CONTAMINANTS.....	5
R 325.51104 Computation formulae.....	3	TABLE G-2. EXPOSURE LIMITS FOR AIR	
R 325.51105 Methods of compliance.....	4	CONTAMINANTS.....	51
R 325.51107 Stay of enforcement.....	4		

R 325.51101 Scope, application, and availability of standards.

Rule 1. (1) These rules do not apply to the following types of employment:

- (a) Agriculture.
- (b) Domestic.
- (c) Mining.
- (d) Construction.

(2) Exposure to air contaminants in construction work is covered by Construction Safety and Health Standard Part 601. "Air Contaminants for Construction."

(3) The following Michigan Occupational Safety and Health Administration (MIOSHA) standards are referenced in these rules. Up to 5 copies of these standards may be obtained at no charge from the Michigan Department of Labor and Economic Opportunity, MIOSHA, Regulatory Services Section, 530 West Allegan Street, P.O. Box 30643, Lansing, Michigan, 48909-8143 or via the internet at the

following website:

www.michigan.gov/mioshastandards. For quantities greater than 5, the cost, as of the time of adoption of these rules, is 4 cents per page.

(a) General Industry Safety and Health Standard Part 302. "Vinyl Chloride," R 325.51401 to R 325.51414.

(b) General Industry Safety and Health Standard Part 303. "Methylenedianiline (MDA) in General Industry," R 325.50051 to R 325.50076.

(c) General Industry and Construction Safety and Health Standard Part 304. "Ethylene Oxide," R 325.51151 to R 325.51177.

(d) Occupational Health Standard Part 305. "Asbestos for General Industry," R 325.51311 to R 325.51312.

(e) General Industry and Construction Safety and Health Standard Part 306. "Formaldehyde," R 325.51451 to R 325.51477.

(f) General Industry and Construction Safety and Health Standard Part 307. "Acrylonitrile," R 325.51501 to R 325.51527.

(g) General Industry and Construction Safety and Health Standard Part 308. "Inorganic Arsenic," R 325.51601 to R 325.51628.

(h) General Industry Safety and Health Standard Part 309. "Cadmium in General Industry," R 325.51851 to R 325.51886.

(i) General Industry Safety and Health Standard Part 310. "Lead in General Industry," R 325.51901 to R 325.51958.

(j) General Industry and Construction Safety and Health Standard Part 311. "Benzene," R 325.77101 to R 325.77115.

(k) Occupational Health Standard Part 312. "1,3-Butadiene," R 325.50091 to R 325.50093.

(l) Occupational Health Standard Part 313. "Methylene Chloride," R 325.51651 to R 325.51653.

(m) General Industry and Construction Safety and Health Standard Part 314. "Coke Oven Emissions," R 325.50100 to R 325.50136.

(n) Occupational Health Standard Part 315. "Chromium (VI) in General Industry," R 325.50141 to R 325.50143.

(o) General Industry Safety and Health Standard Part 340. "Beryllium," R 325.34001 to R 325.34010.

(p) General Industry Safety and Health Standard Part 350. "Carcinogens," R 325.35001 to R 325.35011.

(q) Occupational Health Standard Part 451. "Respiratory Protection," R 325.60051 to R 325.60052.

(r) General Industry Safety and Health Standard Part 590. "Silica in General Industry," R 325.59001 to R 325.59015.

(s) Construction Safety and Health Standard Part 601. "Air Contaminants for Construction," R 325.60151 to R 325.60161.

R 325.51101a Rescinded.

R 325.51102 Definitions.

Rule 2. (1) "Ceiling" means the employee's exposure that shall not be exceeded during any part of the workday. If instantaneous monitoring is not feasible, then the ceiling shall be assessed as a 15-minute, time-weighted average exposure that shall not be exceeded during any part of the working day.

(2) "Skin designation" means those substances so indicated that have toxic effects due to absorption through an employee's skin.

(3) "Short-term exposure limit (STEL)" means the employee's 15-minute, time-weighted average exposure that shall not be exceeded at any time during a workday, unless another time limit is specified in a parenthetical notation below the limit. If another time period is specified, then the time-weighted average exposure over that time limit shall not be exceeded at any time during the workday.

(4) "Time-weighted average (TWA)" means the employee's average airborne exposure in any 8-hour workshift of a 40-hour workweek that shall not be exceeded.

(5) The terms "substance" and "air contaminant" are equivalent in meaning for purposes of these rules.

R 325.51103 Exposure limits.

Rule 3. An employer shall ensure that an employee exposure to any substance listed in tables G-1-A or G-2 in R 325.51108 is limited in accordance with the requirements of all of the following provisions:

(a) With respect to table G-1-A, all of the following provisions apply:

(i) Removed (May 9, 2001).

(ii) Removed (May 20, 2001).

(iii) An employee's exposure to any substance listed in table G-1-A shall not exceed the time-weighted average (TWA) limit, short-term exposure limit (STEL) and ceiling limit specified for that substance in table G-1-A.

(iv) To prevent or reduce skin absorption, an employee's skin exposure to substances listed in table G-1-A with an "X" in the skin designation column following the substance name shall be prevented or reduced to the extent necessary through the use of gloves, coveralls, goggles, or other appropriate personal protective equipment, engineering controls, or work practices.

(v) An employee shall not be exposed to air concentrations between the TWA and STEL limits more than 4 times in a workshift and such exposures shall be no less than 60 minutes apart.

(b) With respect to table G-2, all of the following provisions apply:

(i) An employee's exposure to any substance listed in table G-2 in any 8-hour workshift of a 40-hour workweek shall not exceed the 8-hour, time-weighted average limit given for that substance in table G-2.

(ii) An employee's exposure to a substance listed in table G-2 shall not exceed, at any time during an 8-hour workshift, the acceptable ceiling concentration limit given for the substance in the table, except for a period of time and up to a concentration that does not exceed the maximum duration and concentration allowed in the column under "Acceptable maximum peak above the ceiling concentration for an 8-hour workshift." For example, during an 8-hour workshift, an employee may be exposed to a concentration of Substance A (with a 10 parts of the substance per million parts of air (ppm) TWA, 25 ppm ceiling and 50 ppm peak) above 25 ppm (but not above 50 ppm) only for a maximum period of 10 minutes. Such an exposure shall be compensated for by exposures to concentrations less than 10 ppm so the cumulative exposure for the entire 8-hour workshift does not exceed a time-weighted average of 10 ppm.

(iii) If a substance is preceded by an "S", then an employer shall take the necessary precautions

to prevent an employee from absorbing the substance through his or her skin.

R 325.51104 Computation formulae.

Rule 4. The computation formulas that apply to employee exposure to 1 or more substances that have an 8-hour, time-weighted average listed in table G-1-A or G-2 to determine whether an employee is exposed in excess of the exposure limit are as follows:

(a) An employer shall compute the cumulative exposure for multiple exposures to a single substance for an 8-hour workshift as follows:

$E = (C_1T_1 + C_2T_2 + \dots C_nT_n) \div 8 \text{ hours}$
Where:
E is the cumulative exposure for an 8-hour workshift.
C ₁ is the substance concentration during the first period of time "T" where the concentration remains constant.
C ₂ is the substance concentration during the second period of time "T" where the concentration remains constant.
T is the period of time in hours for which the substance concentration C remains constant.

The value of E shall not exceed the 8-hour, time-weighted average limit for the substance as specified in table G-1-A or G-2.

To illustrate the formula for a cumulative exposure to a single substance, assume that Substance A has an 8-hour, time-weighted average exposure limit of 100 ppm noted in table G-1-A. Assume that an employee is subject to the following exposures over an 8-hour workshift:

- Two hours' exposure at 150 ppm
- Two hours' exposure at 75 ppm
- Four hours' exposure at 50 ppm

Substituting this information into the formula:

$E = [(150 \text{ ppm} \times 2 \text{ hrs}) + (75 \text{ ppm} \times 2 \text{ hrs}) + (50 \text{ ppm} \times 4 \text{ hrs})] \div 8 \text{ hrs}$
$E = [300 \text{ ppm}\cdot\text{hrs} + 150 \text{ ppm}\cdot\text{hrs} + 200 \text{ ppm}\cdot\text{hrs}] \div 8 \text{ hrs}$
$E = 650 \text{ ppm}\cdot\text{hrs} \div 8 \text{ hrs} = 81.25 \text{ ppm}$

Since the cumulative exposure of 81.25 ppm is less than the exposure limit of 100 ppm, then the employee's 8-hour workshift exposure is acceptable.

(b) An employer shall compute the equivalent exposure for a mixture of air contaminants for an 8-hour workshift as follows:

$E_m = (C_1 \div L_1 + C_2 \div L_2) + \dots (C_n \div L_n)$
Where:
E _m is the equivalent exposure to the mixture of air contaminants during an 8-hour workshift.
C ₁ is the average 8-hour concentration of the first substance.
C ₂ is the average 8-hour concentration of the second substance.

L is the 8-hour, TWA exposure limit for that particular substance. The value of Em shall not exceed a value of one (1.0).

To illustrate the formula for a mixture of air contaminants, assume the following exposures:

Substances in mixture	Average concentration of 8-hour exposure (C)	8-hour TWA exposure limit (L)
Substance A	500 ppm	1,000 ppm
Substance B	45 ppm	200 ppm
Substance D	40 ppm	200 ppm

Substituting this information into the formula:

$EM = (500 \text{ ppm} \div 1,000 \text{ ppm}) + (45 \text{ ppm} \div 200 \text{ ppm}) + (40 \text{ ppm} \div 200 \text{ ppm})$
$Em = 0.500 + 0.225 + 0.200$
$Em = 0.925$

Since the value of Em did not exceed one (1.0), the employee's 8-hour workshift exposure to the mixture of air contaminants is acceptable.

R 325.51105 Methods of compliance.

Rule 5. To achieve compliance with the provisions of R 325.51103 and R 325.51104, administrative or engineering controls must first be determined and implemented if feasible. If such controls are not feasible to achieve full compliance, then personal protective equipment or any other protective measures must be used to keep the employee's exposure to air contaminants within the exposure limits prescribed in these rules. Any equipment and technical measures used for this purpose must be approved for each particular use by a competent industrial hygienist or other technically qualified person. If a respirator is used, its use shall comply with the provisions of Occupational Health Standard Part 451. "Respiratory Protection."

R 325.51107 Stay of enforcement.

Rule 7. Enforcement of the limits are indefinitely stayed for the following substances until the United States department of labor, occupational safety and health administration (OSHA) publishes in the Federal Register a notice that a sampling and analytical technique is available:

- (a) Aluminum alkyls.
- (b) Ethylidene norbornene.
- (c) Hexafluoroacetone.
- (d) Mercury (alkyl compounds).
- (e) Oxygen difluoride.
- (f) Phenylphosphine.
- (g) Sulfur pentafluoride.

R 325.51108 Tables.

Rule 8. Tables G-1-A and G-2 read as follows:

TABLE G-1-A. EXPOSURE LIMITS FOR AIR CONTAMINANTS

		TWA		STEL ^D		Ceiling

All MIOSHA Standards shown in this table are referenced in R 325.51101

*	As determined from breathing-zone air samples.
**	Parts per billion.
A	The CAS number is for information only. Enforcement is based on the substance name. For an entry covering more than 1 metal compound measured as the metal, the CAS number for the metal is given – not the CAS number for the individual compounds.
B	Parts of vapor or gas per million parts of contaminated air by volume at 25 °C and 760 Torr.
C	Approximate milligrams of substance per cubic meter of air.
D	Duration is for 15 minutes, unless otherwise noted.
E	The GI & CS Part 311. “Benzene” standard applies to all occupational exposures to benzene, except some sub-segments of industry where exposures are consistently under the action level. These sub-segments include the distribution and sale of fuels, sealed containers and pipelines, coke production, oil and gas drilling and production, natural gas processing, and the percentage exclusion for liquid mixtures. For the excepted sub-segments, the benzene limits in table G-2 apply.
F	Caution—this rule contains extensive requirements for exposure to these substances.
G	If the exposure limit in OH Part 315. “Chromium (VI) in General Industry” is stayed or is otherwise not in effect, the exposure limit is a ceiling of 0.1 mg/m ³ .

TABLE G-2. EXPOSURE LIMITS FOR AIR CONTAMINANTS

TABLE G-2. EXPOSURE LIMITS FOR AIR CONTAMINANTS					
Substance		8-hour, time-weighted average	Acceptable ceiling concentration	Acceptable maximum peak above the acceptable ceiling concentration for an 8-hour workshift.	
				Concentration	Maximum duration
S	Benzene ^{E,F}	10 ppm	25 ppm	50 ppm	10 minutes
S	Ethylene dibromide	20 ppm	30 ppm	50 ppm	5 minutes
Note: S above signifies that skin contact shall not be allowed.					
E	The GI & CS Part 311. "Benzene" standard applies to all occupational exposures to benzene, except some sub-segments of industry where exposures are consistently under the action level. These sub-segments include the distribution and sale of fuels, sealed containers and pipelines, coke production, oil and gas drilling and production, natural gas processing, and the percentage exclusion for liquid mixtures. For the excepted sub-segments, the benzene limits in this table apply.				
F	Caution—this rule contains extensive requirements for exposure to these substances.
