

Recommended Practices for Safety and Health Programs (Formerly Elements)

1 Who Should Attend . . .

This live online program is a must for anyone concerned about health and safety on the job including:

- ▶ Managers concerned about workers' compensation costs.
- ▶ Employees who want to learn proper techniques for protecting their safety and health at work.
- ▶ Business owners who want to learn about compliance with Michigan Occupational Safety and Health Administration (MIOSHA).

2 MIOSHA Training Institute

MIOSHA Consultation Education and Training (CET) Division and Macomb Community College (MCC) have developed the MIOSHA Training Institute (MTI) through a formal alliance. The MTI introduced an Assessment-Based Certificate program, effective October 1, 2007. The certificate program offers participants an opportunity to be recognized for their educational efforts and increased technical expertise. Courses are offered throughout the state in sponsorship with other M-TECSM facilities, community colleges, and safety and health organizations. To learn more about the certificate program, log-on to the CET Division website at www.michigan.gov/mti.

3 What You'll Learn . . .

These recommended practices provide responsible employers, workers, and worker representatives with a sound, flexible framework for addressing safety and health issues in diverse workplaces. They may be used in any workplace, but will be particularly helpful in small and medium-sized workplaces. They can be applied equally well in traditional, fixed manufacturing workplaces and in the service sector, healthcare, retail, and even mobile or office-based work environments.

They also include information specifically aimed at temporary worker and multiemployer work situations. Separate recommended practices are available for the construction industry.

The attendee will learn the recommended practices for a Safety and Health Program and how they place emphasis on involving workers, and include a more robust program evaluation element to help drive continuous improvement. The recommended practices also stress the need for communication and coordination on worksites involving more than one employer. **Virtual classroom with an in-person instructor. This training format can be taken from the office, home, or remotely.**

Required Class for
General Industry
Level One
MTI Certificate

Agenda

- ▶ The benefits of implementing these practices.
- ▶ Core elements of the safety and health programs.
- ▶ 10 easy things to get your program started.
- ▶ How to accomplish each core element.

This course has been approved for both residential builders pre-licensure and continuing safety training requirements.

All meetings are accessible and barrier free. Please contact the cosponsor or the CET Division, at least 30 days in advance, to request necessary accommodations.

Facilitator

Jeff Edgerton joined the General Industry Division of MIOSHA in 2012 as a Safety Officer. For more than seven years, he conducted inspections in high-hazard industries, addressed employee complaints, and investigated workplace injuries and fatalities.

In 2019, Jeff was appointed to the position of Occupational Safety Consultant in MIOSHA's Consultation Education and Training Division. In this capacity, he advises general industry employers, workgroups, and governmental agencies in areas relating to occupational safety hazards and compliance with MIOSHA Safety Standards. He also conducts hazard surveys and develops and delivers training seminars.

Prior to joining MIOSHA, Jeff worked in construction and for the Flint Community School District. He received a Bachelor of Arts degree from the University of Michigan-Flint in 2009.

Presenters: Jeff Edgerton, Occupational Safety Consultant; and Mike Brodzik, Senior Occupational Safety Consultant; MIOSHA-CET Division
