Notes

- As the Michigan Department of the Treasury does not use population estimates in determining municipal population count, the population information reported above was collected by the U.S. Census Bureau during the most current decennial census which occurred in 2010. Many of the libraries listed above serve multiple municipalities, the total population served is an aggregated count of the population of those municipalities.
- The data table above was created using the 2019 public library data reported as a part of the Public Library Survey collected annually.
