Course Title: Legally Justified But Was It Avoidable
Course ID:
Description: The 1989 Graham v. Connor case established that the moment an officer uses force is all that matters when determining if it was reasonable. It determined the moment could not be judged with the 20/20 vision of hindsight. How that moment came to be matters not, only what was happening during it. We should look backward from the moment force was used and assess whether the officer, by action or lack of action, contributed to its ultimate need.
