Re: M-13 Bridge Project over the Flint River and Birch Run Outlet Drain

Dear Mr. Philip,

We are currently in negotiation with MDOT for the sale of property needed for the reconstruction of the bridges over the Birch Run Outlet Drain and the Flint River along M-13 in Saginaw County. In general, we are in favor of the bridge project and give our approval to have the development rights released if the Saginaw County Dike Board and the Michigan Department of Agriculture are in agreement that this will be the best use of the property to be released for the project. This project is not only about building new bridges, we have the flood control needs of the local land owners to take into consideration, as well as the preservation of farmland. Thank you for your attention to these details.

Sincerely,

William and Cherie Bremer
