

Help Stop the Spread of Exotic Insects and Diseases

In addition to spreading emerald ash borer, firewood can also carry: *beech bark disease, oak wilt, Asian longhorned beetle, gypsy moth, and other pests.*

It is illegal to move *hardwood firewood* from the Lower Peninsula into the Upper Peninsula, out of the quarantined areas of Michigan or from anywhere in Michigan to the islands labeled on this map.

- Protected Islands
- Level I
- Level II

MDARD Customer Service Center
Toll Free: (800) 292-3939

Don't Move Firewood
Buy It & Use It Locally

* *Hardwood firewood* that is certified by USDA-APHIS for the Federal EAB Quarantine is exempt from the quarantine movement restrictions if it is packaged, bears a USDA compliance stamp and is clearly marked with the producer's name and address.
