SUGGESTED DESIGN FEATURES
1. 4" smooth finish slab on grade, sloped to center.
2. 2/12 roof pitch
3. 12 inches overhang on sides and rear
4. 24 inches overhang on entry
5. 45 degree entry door
6. 48x24 window
7. 24x40-2 compartment utility sink or space or washer/dryer combo

VARIABLE LIST OF MATERIALS
1. PVC / length of drain line to septic from washers
2. Water heater plumbed in unit if outside unit is unavailable
3. Electrical wiring and outlets
4. Electrical wiring and outlets

SUGGESTED DESIGN LIST OF MATERIALS
1. 4" in thickened slab on grade. (About 1 cubic yard of concrete)
2. 36 ft. of treated 2x4 for sill plate
3. 44 ft. of 2x6 (sub fascia/ side, front, rear roof framing)
4. 44 ft. of aluminum fascia if framing is untreated wood
5. 132 sq. ft. of sheet metal for roofing (assuming 10% waste)
6. 180 ft. of 2x4 (front/ side/ rear wall framing at 24 inches o.c., assuming 10% waste)
7. 250 sq. ft. of sheet metal for front/ side/ rear wall covering (assuming 10% waste)
8. 10-12'-2x6 for roof framing (roof at 16" o.c. and includes 10% waste)
9. 1-3/0x6/8 steel entry door/9 lite or built-in screen for additional light and ventilation
10. 1-4824 window
11. 1-exterior dusk to dawn, centered between entry door and window, under overhang

OPTION 1
- 4" smooth finish slab on grade.
- 2/12 roof pitch.
- 12" overhang on sides.
- 24" overhang on entry.
- 45 degree entry door.
- 48x24 window.
- 24x40-2 compartment utility sink or space or washer/dryer combo.

OPTION 2
- 4" smooth finish slab on grade.
- 2/12 roof pitch.
- 12" overhang on sides.
- 24" overhang on entry.
- 45 degree entry door.
- 48x24 window.
- 24x40-2 compartment utility sink or space or washer/dryer combo.

OPTION 3
- 4" smooth finish slab on grade.
- 2/12 roof pitch.
- 12" overhang on sides.
- 24" overhang on entry.
- 45 degree entry door.
- 48x24 window.
- 24x40-2 compartment utility sink or space or washer/dryer combo.

This side can also be attached to existing structure if conditions permit.

MICHIGAN DEPARTMENT OF AGRICULTURE AND RURAL DEVELOPMENT
DATE: 7/29/19

SUGGESTED LAUNDRY ROOM ADDITION OPTIONS
- It is understood that each camp would have different laundry needs.
- These suggested layouts are intended to provide ideas for a planned layout of a detached or attached laundry room addition.
- All electrical receivables used for an automatic washing machine shall be GFCI type and meet applicable electrical code requirements.
- If cold weather use is anticipated, (before May 31 and after September 1), an approved heating device capable of maintaining a min of 65 degrees shall be provided.
- Ventilation of clothes dryers shall meet applicable mechanical codes.
- Material quantities are rough estimates for guidance purposes and are not inclusive of all materials.
