

# De-duplicating Chronic Hepatitis B Reports in MDSS

## Notes

- Electronic Lab Reports (ELRs) for hepatitis B virus (HBV) are generally reported in MDSS as **Hepatitis B, Acute**. (Refer to MDSS **Case Definition tab** for accurate status)
- Acute Hepatitis B for women of childbearing age (10-60 years) would also need to have pregnancy status confirmed. If pregnant, these women also need to be reported to the PHBPP.
