Subject: Birthing Hospital Mini-Grant Awards for Planning

Michigan Department of Community Health is pleased to announce the awarding of mini grants to 32 of Michigan's 83 birthing hospital nurseries. The purposes of these grants are to support birthing hospital nurseries to conduct a planning effort to review and revise their newborn discharge procedures to: 1) identify Medicaid eligible beneficiaries, educate beneficiaries about MIHP services, and refer the family to a local Maternal Infant Health Plan (MIHP) provider; and 2) to identify infants that may potentially need Children's Special Health Care Services (CSHCS), educate about CSHCS, and refer families to the CSHCS program in the local health departments.

MIHP is a benefit service of Medicaid. Due to the evidence demonstrating the success of improving pregnancy outcomes and infants' life course trajectory, we wish to see an improvement in outreach for this targeted Medicaid service, unless the family is already involved in a home visiting service. In addition, we wish to promote and support earlier access to CSHCS for families in need of specialty health care for children with special health care needs. The hospital nurseries can be a key point of identification of families potentially in need. These actions are a developmental step in the evolving Michigan Perinatal Care System to ultimately improve birth outcomes, and the surviving and thriving of our states' infants.

We are pleased with the responses from the hospitals, and have awarded mini planning grants to the following institutions:

Alpena Regional Medical Center, Alpena  
Aspirus Grand View, Ironwood  
Charlevoix Area Hospital, Charlevoix

There are two maps attached for your reference: one represents the distribution and locations of birthing hospitals that received a mini planning grant; and the second identifies the locations of all evidence-based home visiting programs, including MIHP.

As the health officials and leaders in your community, your agency may have received contacts from the birthing hospital(s) in your jurisdiction requesting partnership as referral assessment activities begin. If this has not already occurred, we would like to encourage your agency to make the contact. For your reference, attached is a list of the facility's project director and counties of residence for most women who deliver at the hospital as identified in the application.

If you have questions or wish additional information, please contact MDCH Perinatal Health Nurse Consultants, Trudy Esch at [escht@michigan.gov](mailto:escht@michigan.gov) or 517-335-3593 or Dawn Shanafelt at [shanafeltd@michigan.gov](mailto:shanafeltd@michigan.gov) or 517-335-4411.

indicating counties served, model used and funding sources

Home visiting is a voluntary service providing periodic home visits to improve the health, well-being, school-readiness, safety and self-sufficiency of pregnant women and families with children aged birth-five. Different home visiting models are developed for families with different risk factors and therefore achieve different outcomes.
