\*\* Influenza vaccine recommendations change from year to year. Please check [www.michigan.gov/flu](http://www.michigan.gov/flu) for the most current changes, or call your local health department.

Combination vaccines should always be documented under each antigen.  
For more information, call your health care provider, your local health department, or 1-888-767-4687.

or [www.cdc.gov/nip](http://www.cdc.gov/nip)

Getting immunized is a life-long job that prevents serious diseases.

- Children 11-12 years of age need shots to prevent tetanus, diphtheria, pertussis (whooping cough), and meningococcal disease. Girls should receive human papillomavirus vaccine.
- All adults (not just the elderly) need vaccines to protect them from severe illnesses.
- Many people need yearly influenza vaccine. Ask if you or one of your family members should get flu vaccine.

DCH-0592 (05/2007)

Authority: Act 368 1978

Keep track of the immunizations you and your child have received.

- Bring your immunization card to every medical visit. This is necessary for children and adults.
- Ask to have your card updated every time vaccines are given.
- The Michigan Care Improvement Registry (MCIR) keeps immunization records for Michigan residents. Ask if the vaccine you or your child received is entered in MCIR.
- Children must meet Michigan's immunization requirements to enroll in any nursery, day care, preschool or head start program, and public or non-public school.

**To obtain free copies of the Official Certificate of Immunization Record, please contact your local health department or Jacquelyn Jones at (517) 335-9387.**
