

- Students perform better when they show up for class healthy and ready to learn.
- **My name is Janet Olszewski, and I am the director of the Michigan Department of Community Health.**
- The department's Child and Adolescent Health Program has 57 school-based health centers in 24 counties located in our urban, suburban and rural areas.
- **Each year nearly 200,000 uninsured or underinsured children across the state receive a wide range of services at these centers such as immunizations, physical exams or HIV education.**
- From primary care to prevention efforts, these centers give our children and adolescents a healthy outlook on their future – in and out of the classroom.
- **On this 20<sup>th</sup> anniversary of Michigan's Child and Adolescent Health Centers, I encourage you to take advantage of the services offered by a center near you.**
