

Black AIDS Awareness Month

- **HIV and AIDS continue to create a heavy impact on the African American community.**
- The Michigan Department of Community Health estimates that 1 in 100 African-American males and 1 in 260 African-American women in Michigan may be infected with HIV.
- **My name is Janet Olszewski and I am Director of the Michigan Department of Community Health.**
- The State of Michigan recently kicked off its fourth annual Black AIDS Awareness Campaign.
- **Through March 15th, events will take place across Michigan to raise awareness about HIV and AIDS in the African American community.**
- We cannot ignore the uneven burden HIV and AIDS has on African Americans. Please, help stop the spread of this disease and get tested.
- **For more information, call the Michigan AIDS Hotline at 1-800-872-AIDS (2437).**
