1. This estimate includes all persons living in CALHOUN CO. at diagnosis of HIV or AIDS, including those not reported or not yet diagnosed. All estimates are rounded to the nearest ten, and the minimum estimate given is 10. The formula used to gain these estimates was updated October 2003, January 2004 and January 2007 so that numbers are only rounded at the end of the estimate calculation and so that cases with no identified risk are no longer part of the equation. This may result in minor variations when compared to past estimates.

2. Includes reports that contain patient name or are otherwise unduplicated.

3. Age, sex, race, and behavior percentages are calculated excluding missing data. The percentages of total cases missing this demographic information are given in parentheses.

4. This subset of undetermined includes persons who had heterosexual sex but their partner(s)' risk is unknown.

Note: ** and <5 = 1, 2, 3, or 4 cases

Note: Risk categories used in Michigan were newly defined as of the July 2007 Quarter. The Statewide July 2007 quarterly data contains the new categories, however, Calhoun county quarterly stats will not be updated until October 2007.

TOTAL 70 175 116

***Reported HIV/AIDS prevalence (all persons currently living with an HIV or AIDS diagnosis) is 105 persons through July 1, 2007***

***Reported AIDS prevalence (all persons currently living with an AIDS diagnosis & note this is a subset of the HIV/AIDS prevalence listed above) is 51 persons through July 1, 2007***

Note: The number of persons ever diagnosed with HIV is seen as prevalence + deaths = entire experience
The reported number of Calhoun County residents living with HIV/AIDS and AIDS

![Graph showing the total number of persons diagnosed with HIV/AIDS, with a rising trend from 1984 to 2007. The graph also shows the prevalence of HIV/AIDS over the same period.](image)
