

FOR HEALTHY FUNDRAISING

Fundraising is a way for schools to generate additional resources that contribute to the educational experience for students. Funds are often used for field trips, playground equipment, general school supplies, athletic uniforms and many other things. Many fundraisers revolve around foods high in sugar and fat with little nutritional value. It is important to support our schools and the healthy messages being taught by utilizing healthy fundraising. Healthy fundraising sends the message to children that their health is more important than the money made by selling unhealthy foods.

Be Creative! Support the schools and your students by Going For Healthy Fundraising!

Ideas to Sell

Space on school message board to wish happy birthday or congratulate an accomplishment

School spirit wear

School mascot tattoos

School spirit stickers

License plate holders with school logo

School spirit water bottles
