Also available from CDC

This self-study series is offered free of charge in DVD and web-on-demand formats.

Continuing Education credits will be provided.

2008 Epidemiology & Prevention of Vaccine-Preventable Diseases

This four-part self-study series provides the most current information available in the constantly changing field of immunization. Together, the four sessions offer a comprehensive overview of immunization. Session ONE discusses principles and general recommendations on immunization. Sessions TWO, THREE and FOUR discuss specific vaccine-preventable diseases and their respective vaccines. Each of the four sessions is three hours in duration. For more information on how to order the DVD or to access the web-on-demand version, visit our website.
