- Preparedness & Extreme Weather Conditions Food & Water Supply
 Air Pollution & Respiratory Health Mental Health
 Water- & Vector-Borne Diseases

Tell Us about Your Hometown Health Hero

Janet Kiley and Angela Glew have inspired an entire floor of Community Health employees to start recycling Styrofoam and PET #1 Water Bottles! Both women continue to educate about the benefits of recycling and how an individual's small steps can make a big impact on reducing the effects of climate change. Every two weeks, Ms. Kiley takes a floor's worth of used Styrofoam to be recycled into useful products like baseboard and crown molding! And as needed, Ms. Glew takes the water bottles to a common location where they are gathered and taken to eventually be recycled into items like carpet, clothes, or even new bottles.

Every bottle and piece of Styrofoam these inspired women keep out of Michigan landfills adds further to greenhouse gas savings!

Submit completed forms via email to kovalj@michigan.gov or fax to 517-335-9434 by **March 7, 2008**.
