

Census of Hospital-Based Palliative Care Programs

Michigan 2006 Findings

Kay Presby MPH RN

MHPCO PC Advisory Work Group 12.08.06

Project Sponsors

- Michigan Dept of Community Health
- Michigan Public Health Institute
- Michigan Hospice & Palliative Care Org
- Michigan Cancer Consortium

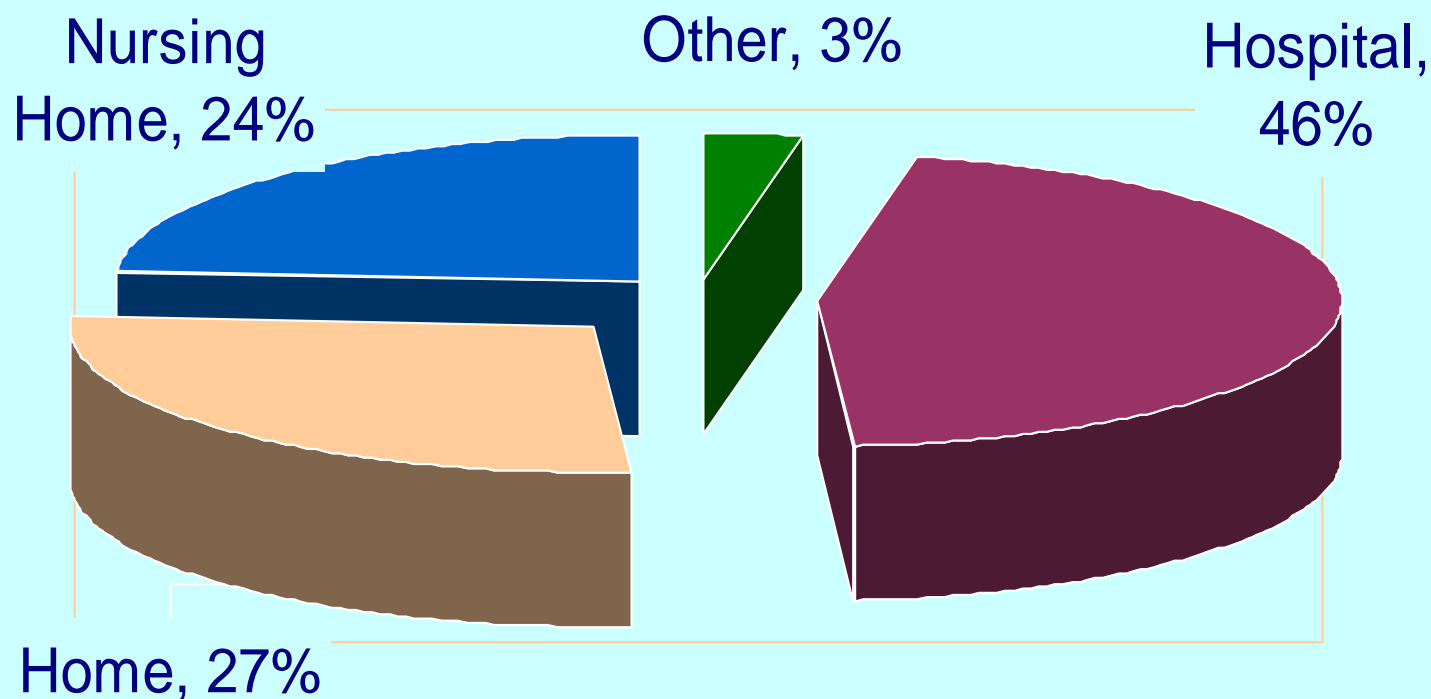

Project spurred by...

- Data from 2004 BRFS & EOL assessment
- Revision of strategic plan for Michigan Cancer Consortium's end-of-life care priority:

By 2010, prevent & reduce avoidable suffering during the last phase of life for persons with cancer...

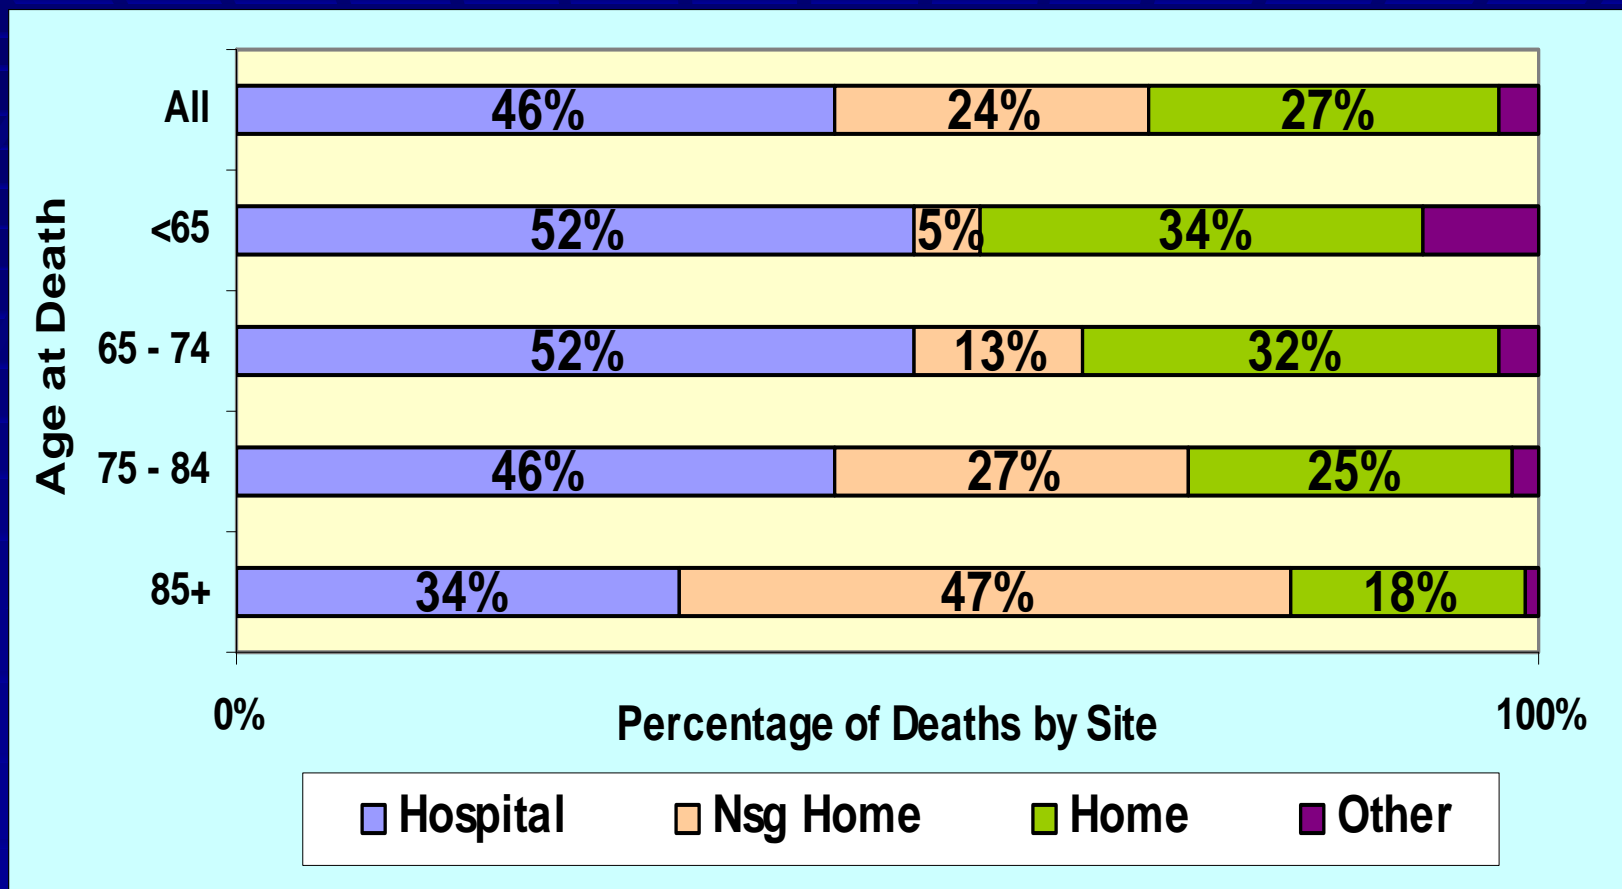

- Objective 2: Promote system change to increase access to palliative services throughout Michigan

Percentage of Deaths by Place of Death, Michigan Residents, 2002

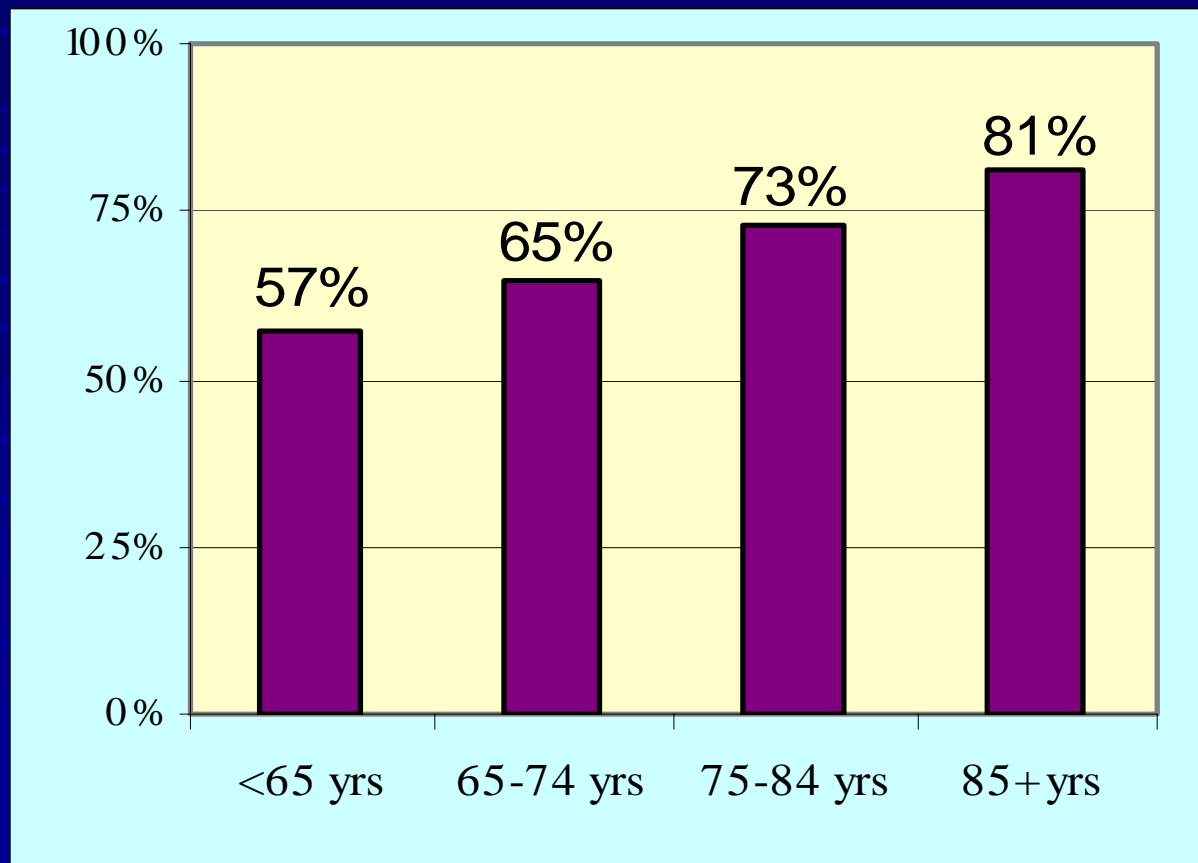

2002 Michigan Resident Death File, MDCH

Place of Death by Age, Michigan 2002

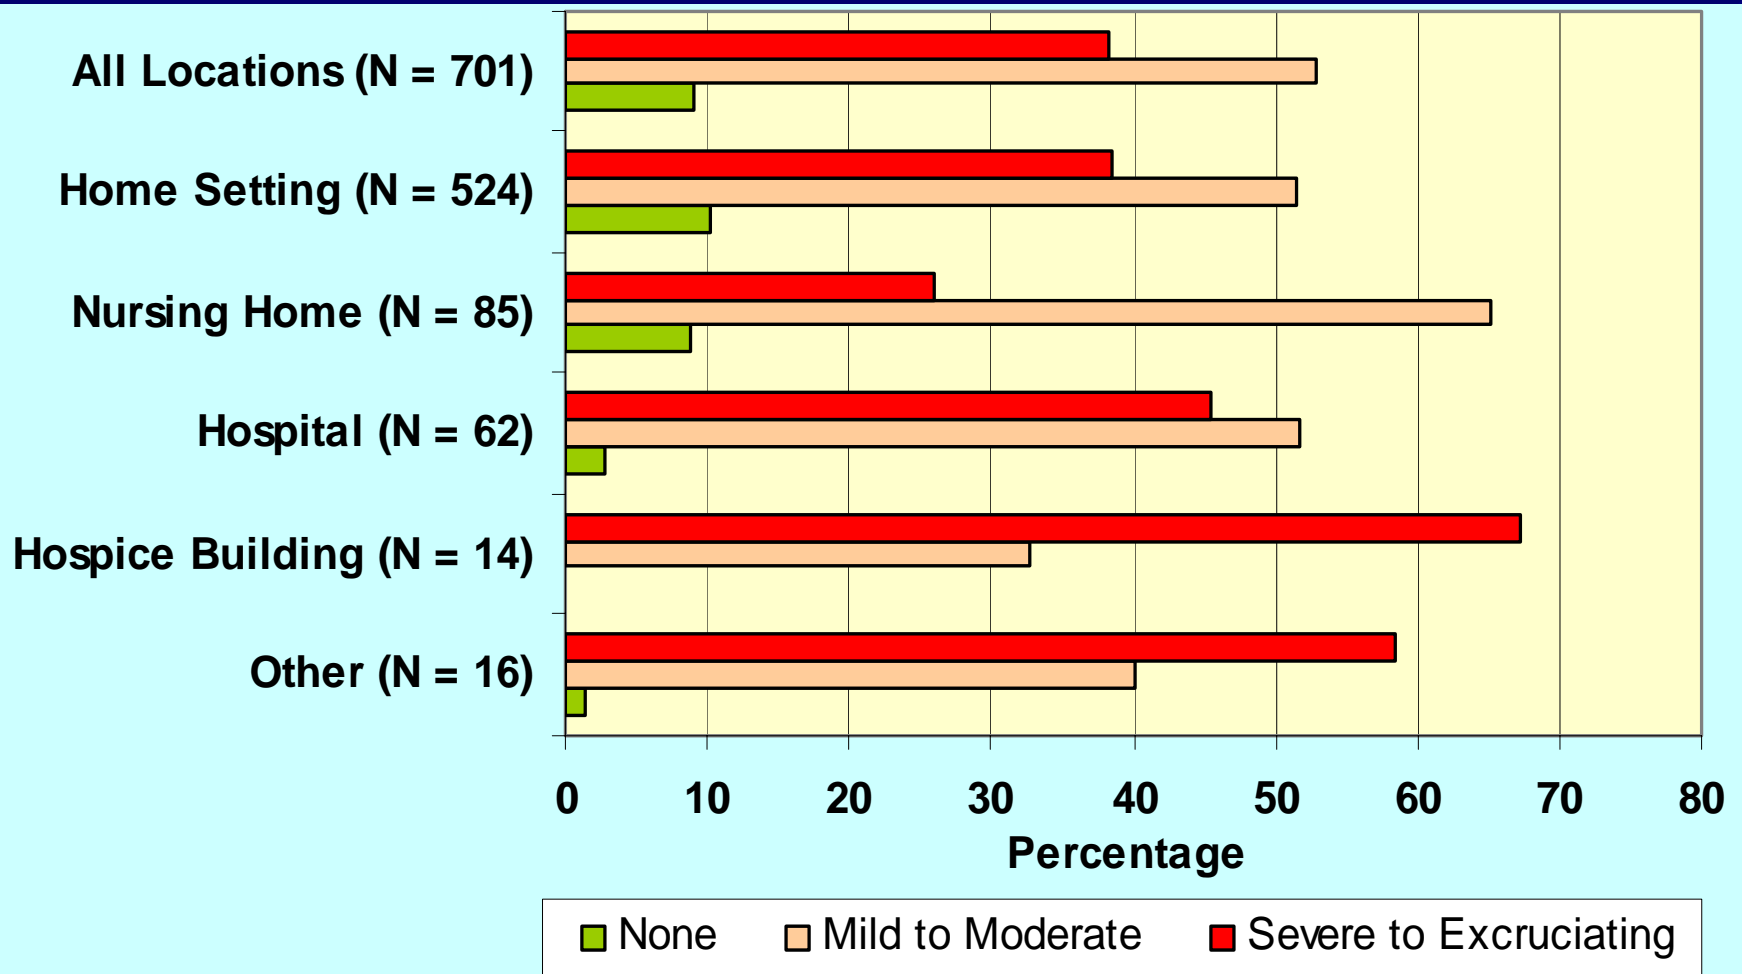

Michigan Resident Death File, 2002

Percentage of Deaths in Facilities by Age Group, Michigan Residents, 2002

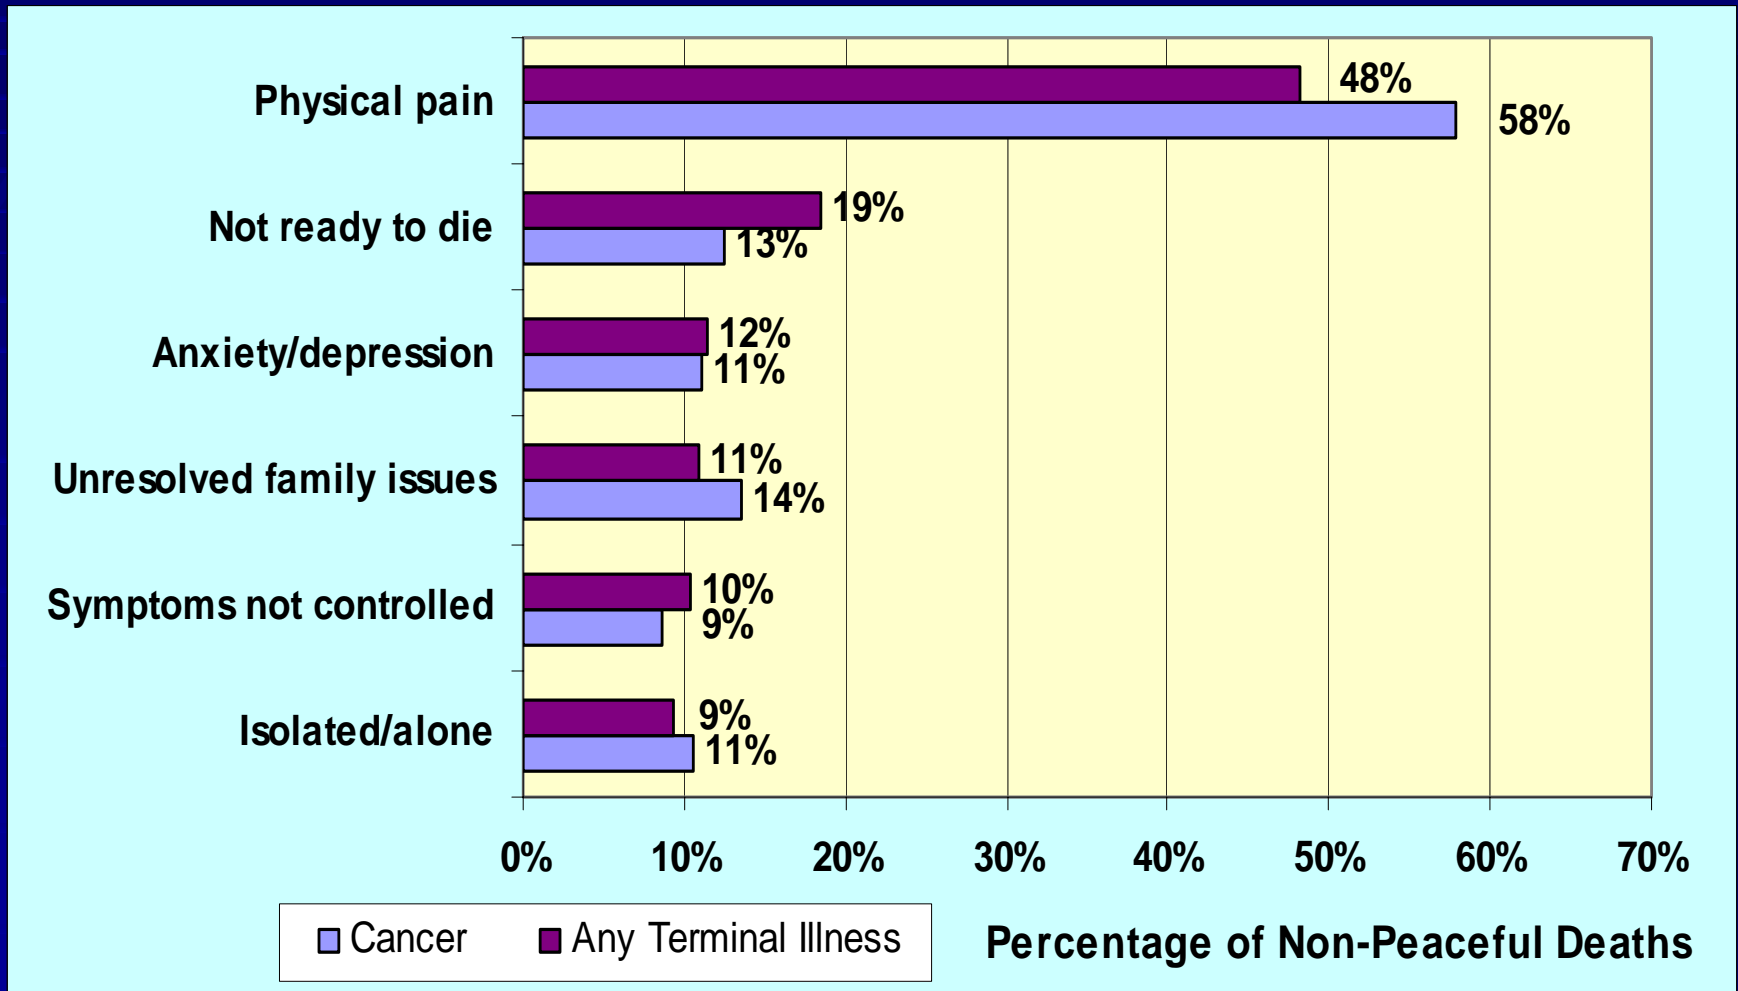

2002 Michigan Resident Death File, MDCH

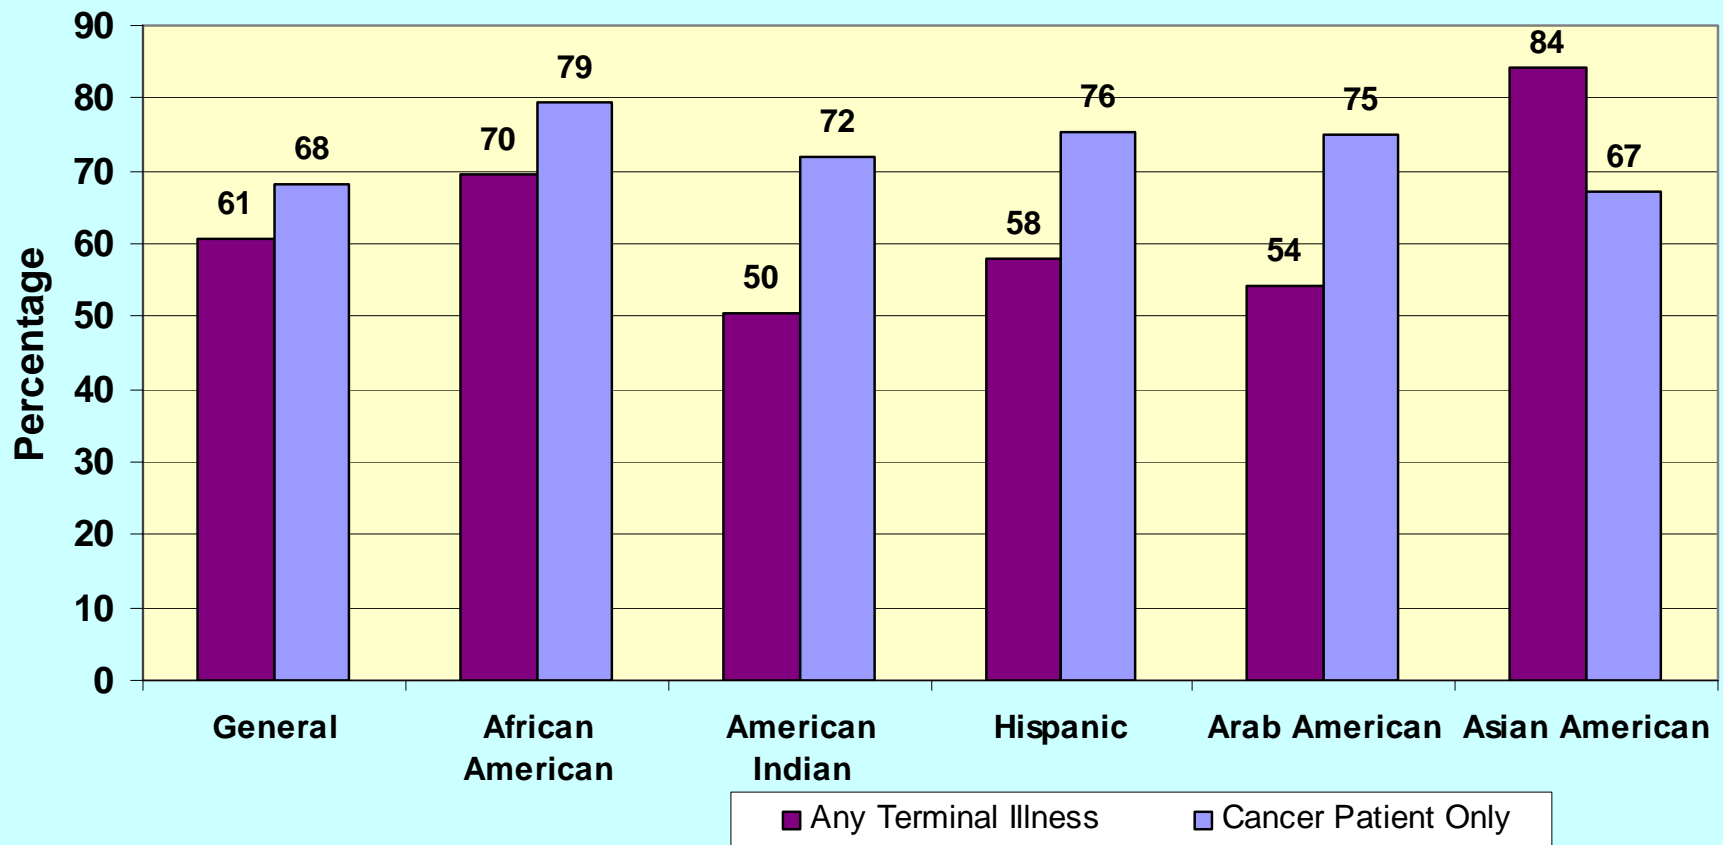

Distribution of Decedents, **Any Terminal Illness**, by Site & Avg Pain Level for Final 3 Months, MI 2004 BRFs

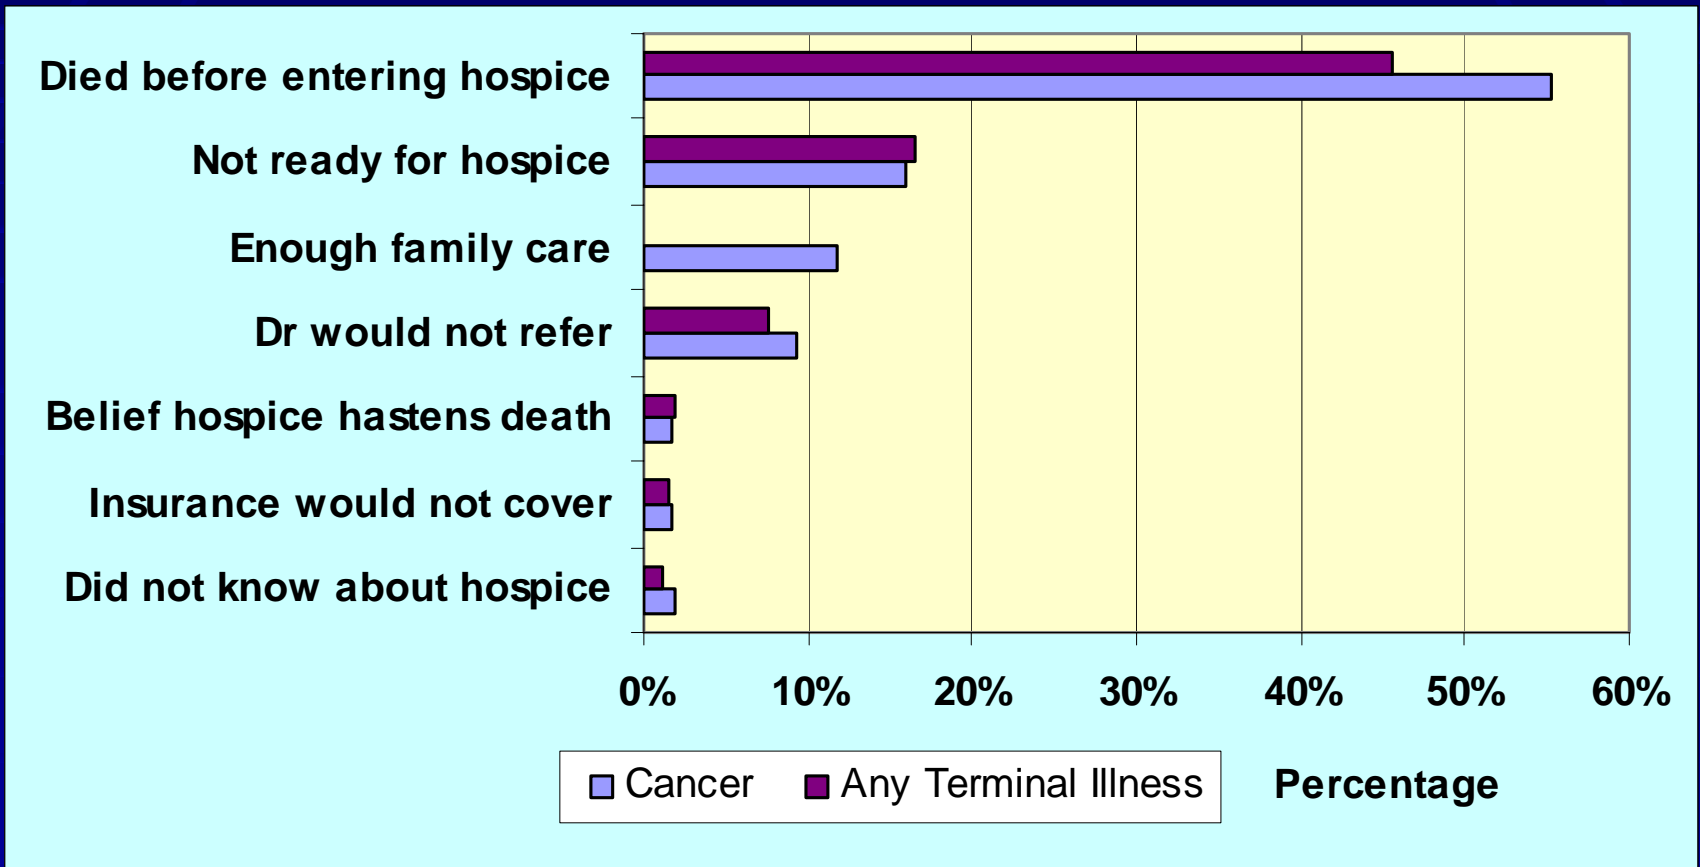

Caregivers' Top Reasons Why 48% of Deaths Were Not Completely Peaceful, MI 2004 BRFS

Patient Received Hospice Care in Final 3 Months, Any Terminal Illness vs Cancer, MI 2004 BRFSS

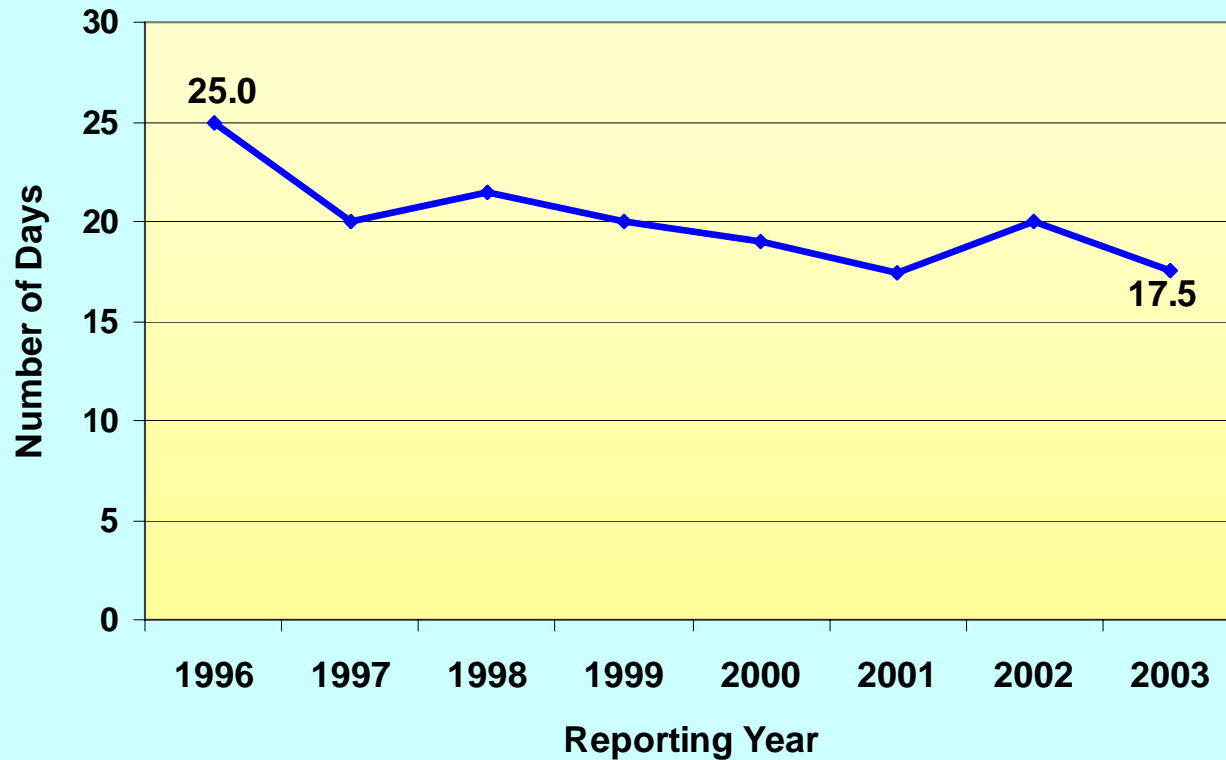

Caregivers' Top Reasons Why 30%-40% Did Not Choose Hospice for End of Life Care, MI 2004 BRFSS

Median and < 7 Day Lengths of Stay for Hospice Discharges, 1996-2003

Michigan Hospice and Palliative Care Organization

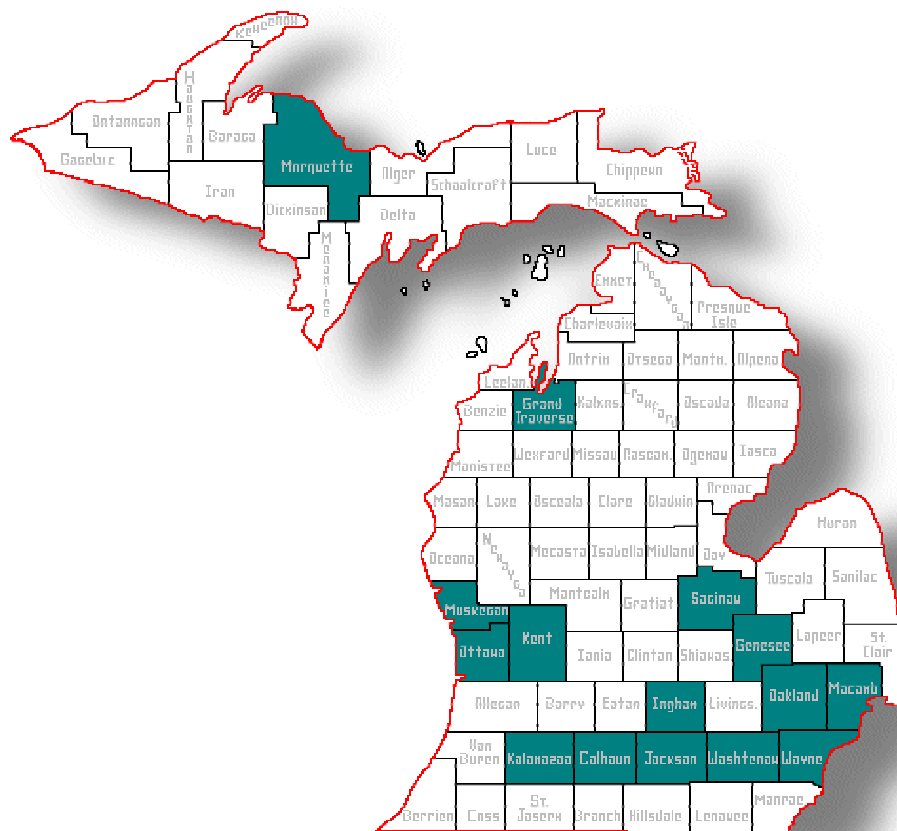

**Percentage of
MI patients that
died in < 7 days**

2003 34.9%
2002 30.5%
2001 29.2%

National Data Set

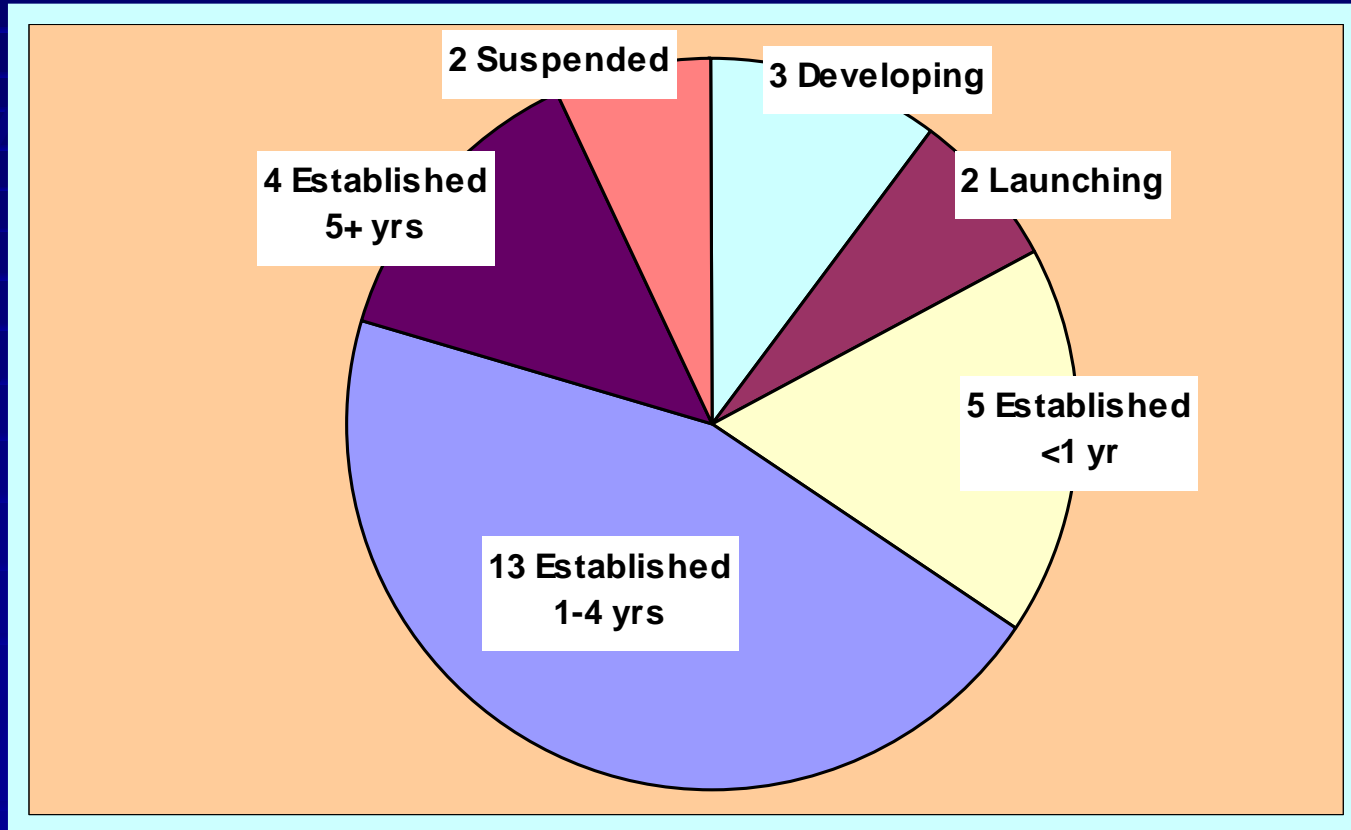

Michigan 2006 Palliative Care Census: Findings

Location of Hospital-Based PC Services

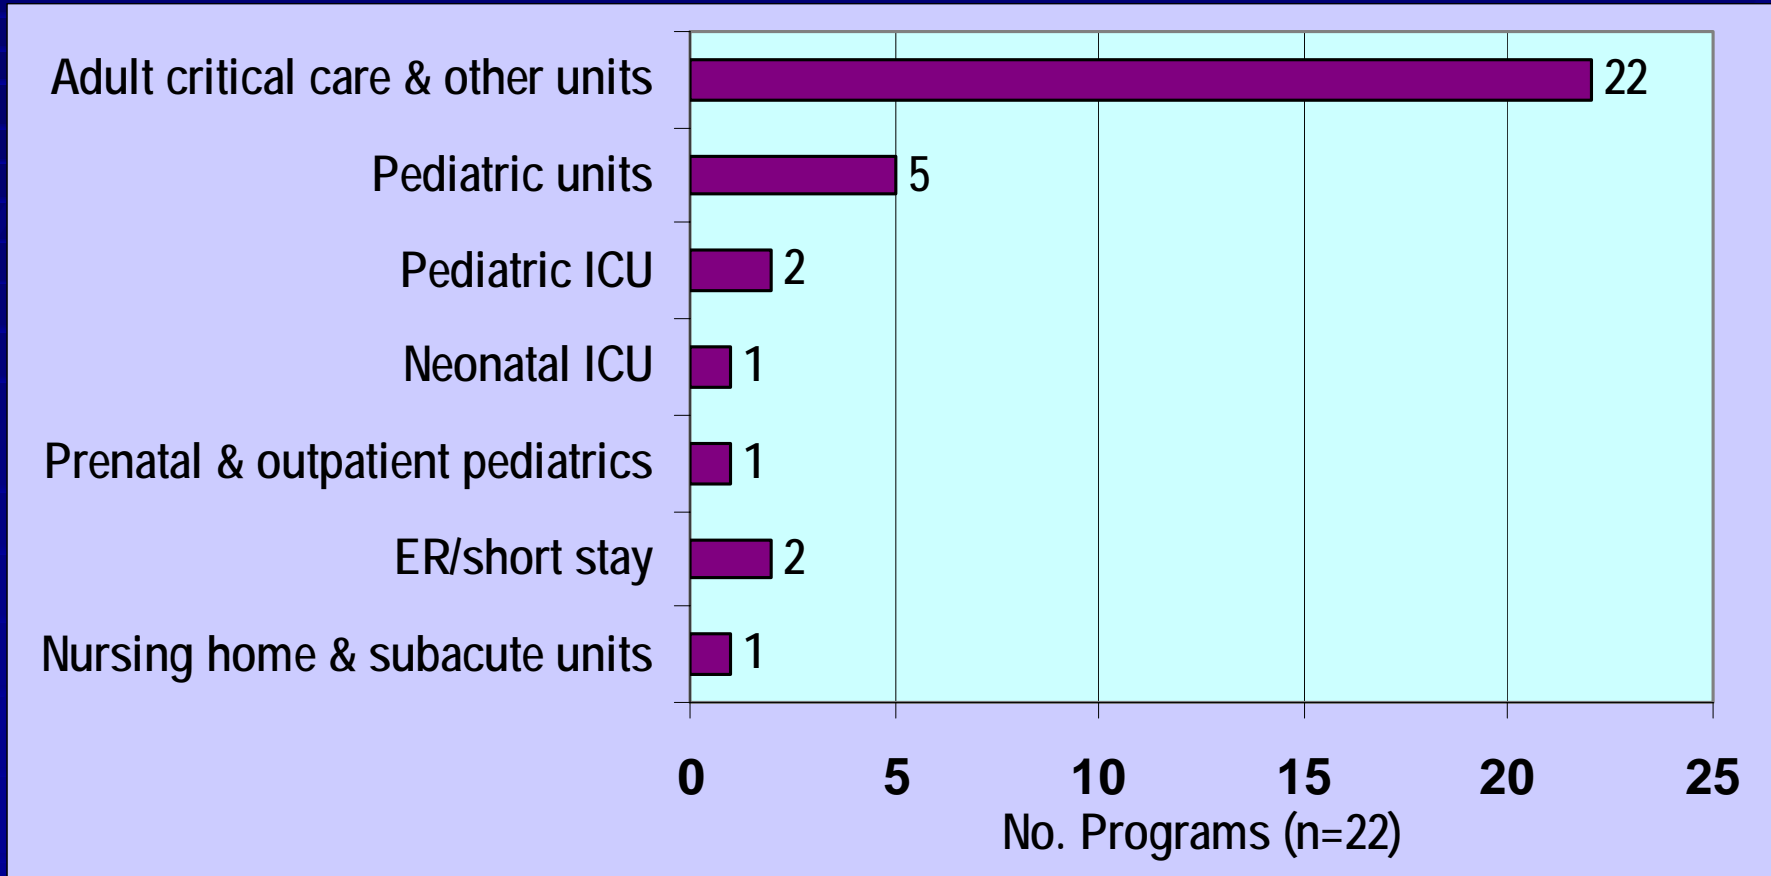

10-4-06

Status of 29 Responding PC Programs

Populations Served

PC Recipient Profile for Jul 05—Jun 06

(rough estimates for 22 palliative care teams)

~ 7,400 Total patients served

~70% Met clinical criteria for hospice
(inpatient recipients)

~33% Had cancer as primary diagnosis

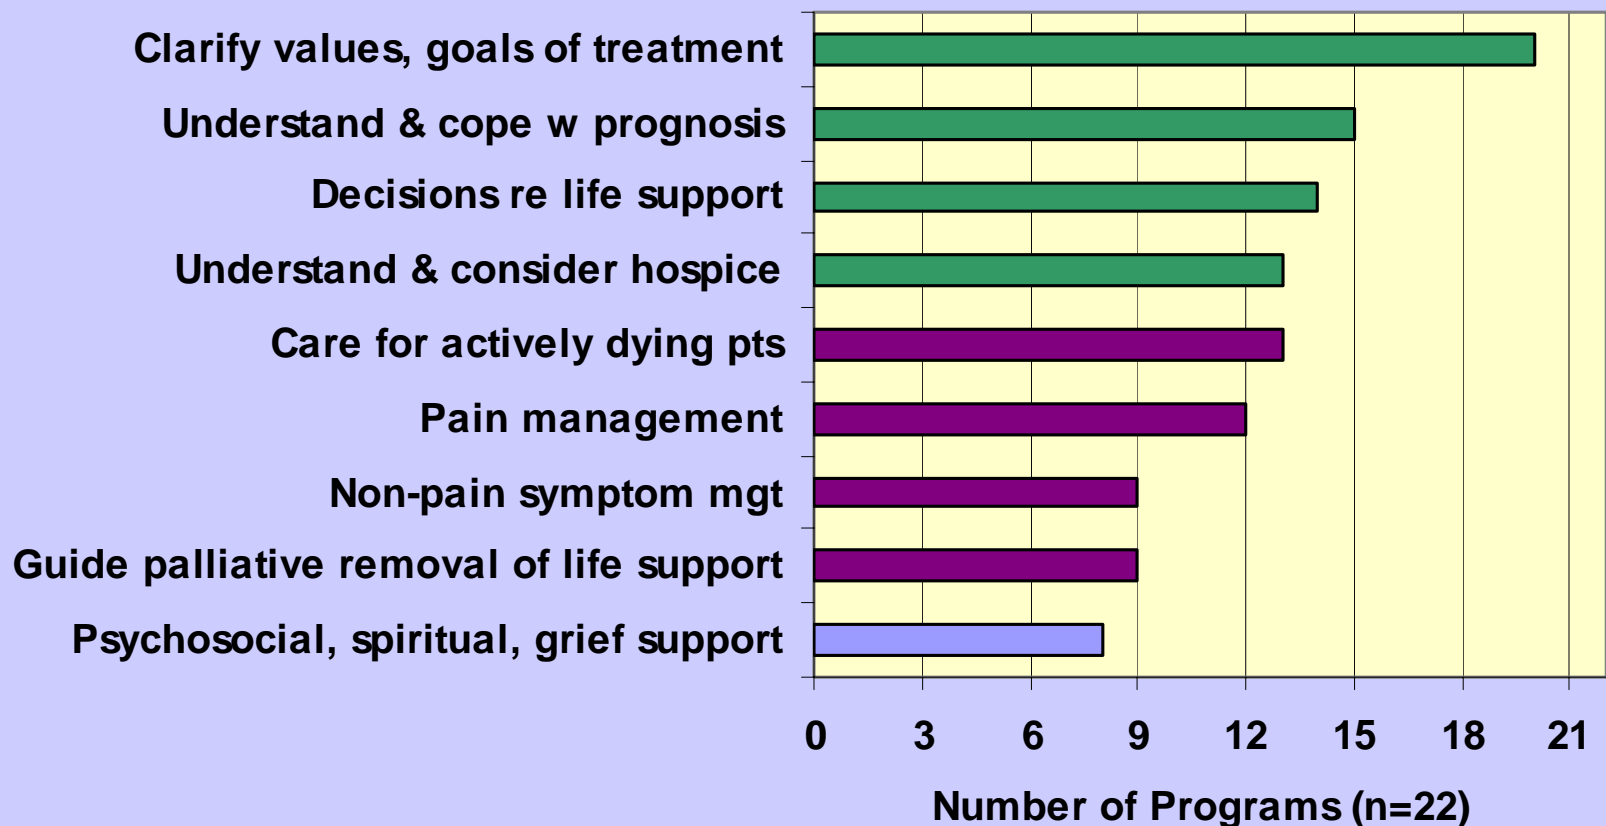

~31% Of inpatient decedents received PC
services

What criteria qualify a person for palliative services at your hospital?

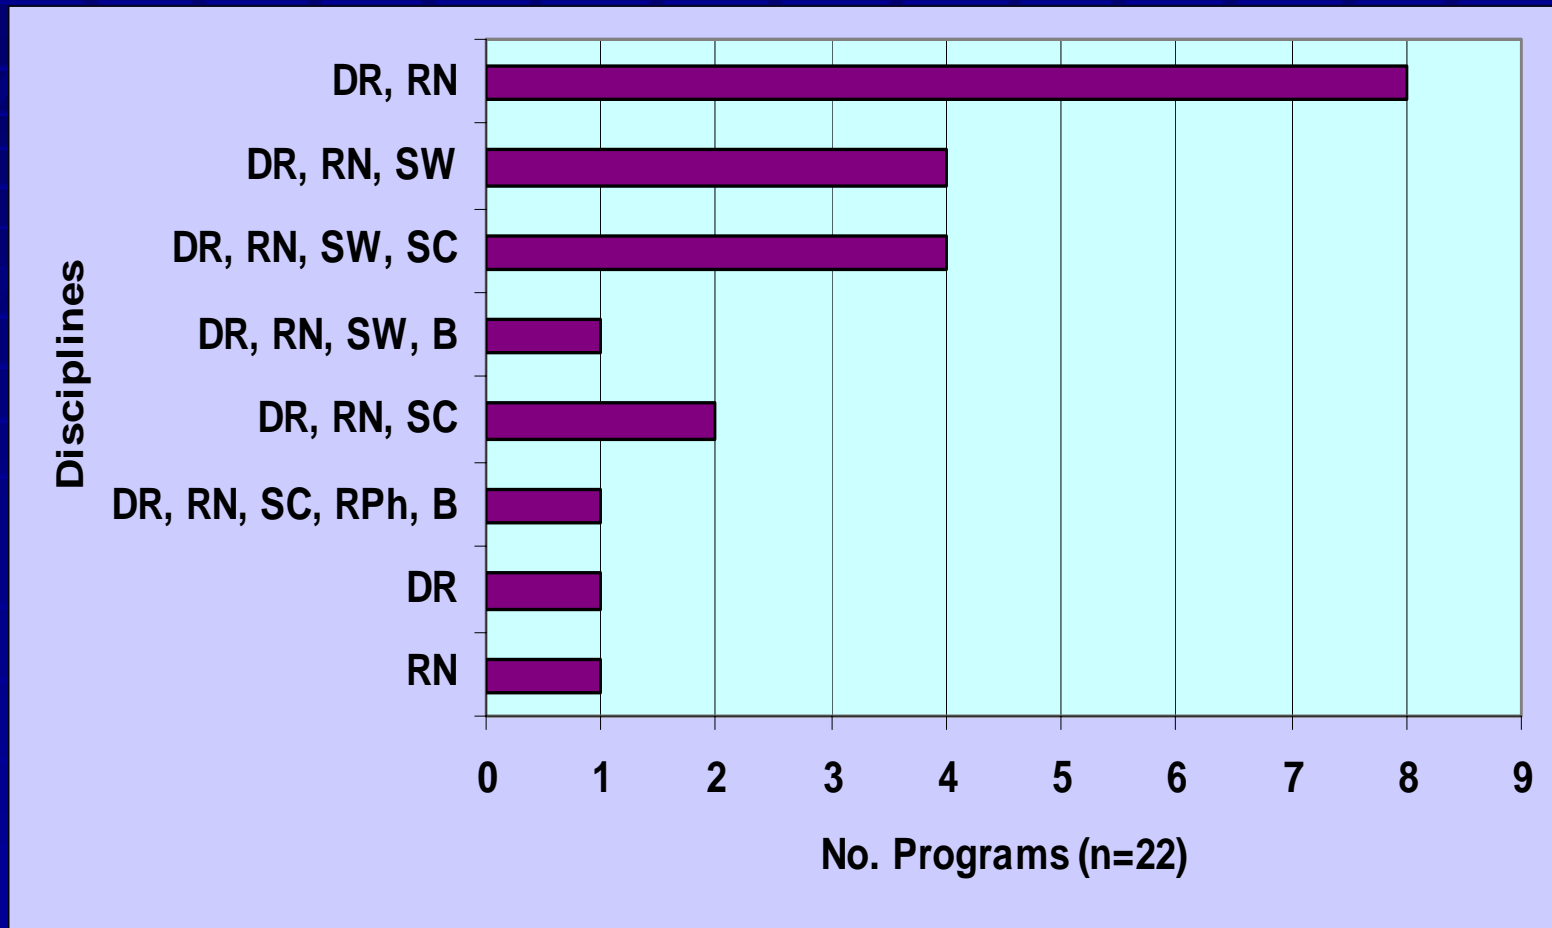

- Serious or life-limiting illness (12)
- Consult order (8)
- Unacceptable pain/symptom distress (6)
- Prolonged length of stay (4)
- Need for complex decision-making (3)

(n=22 programs)

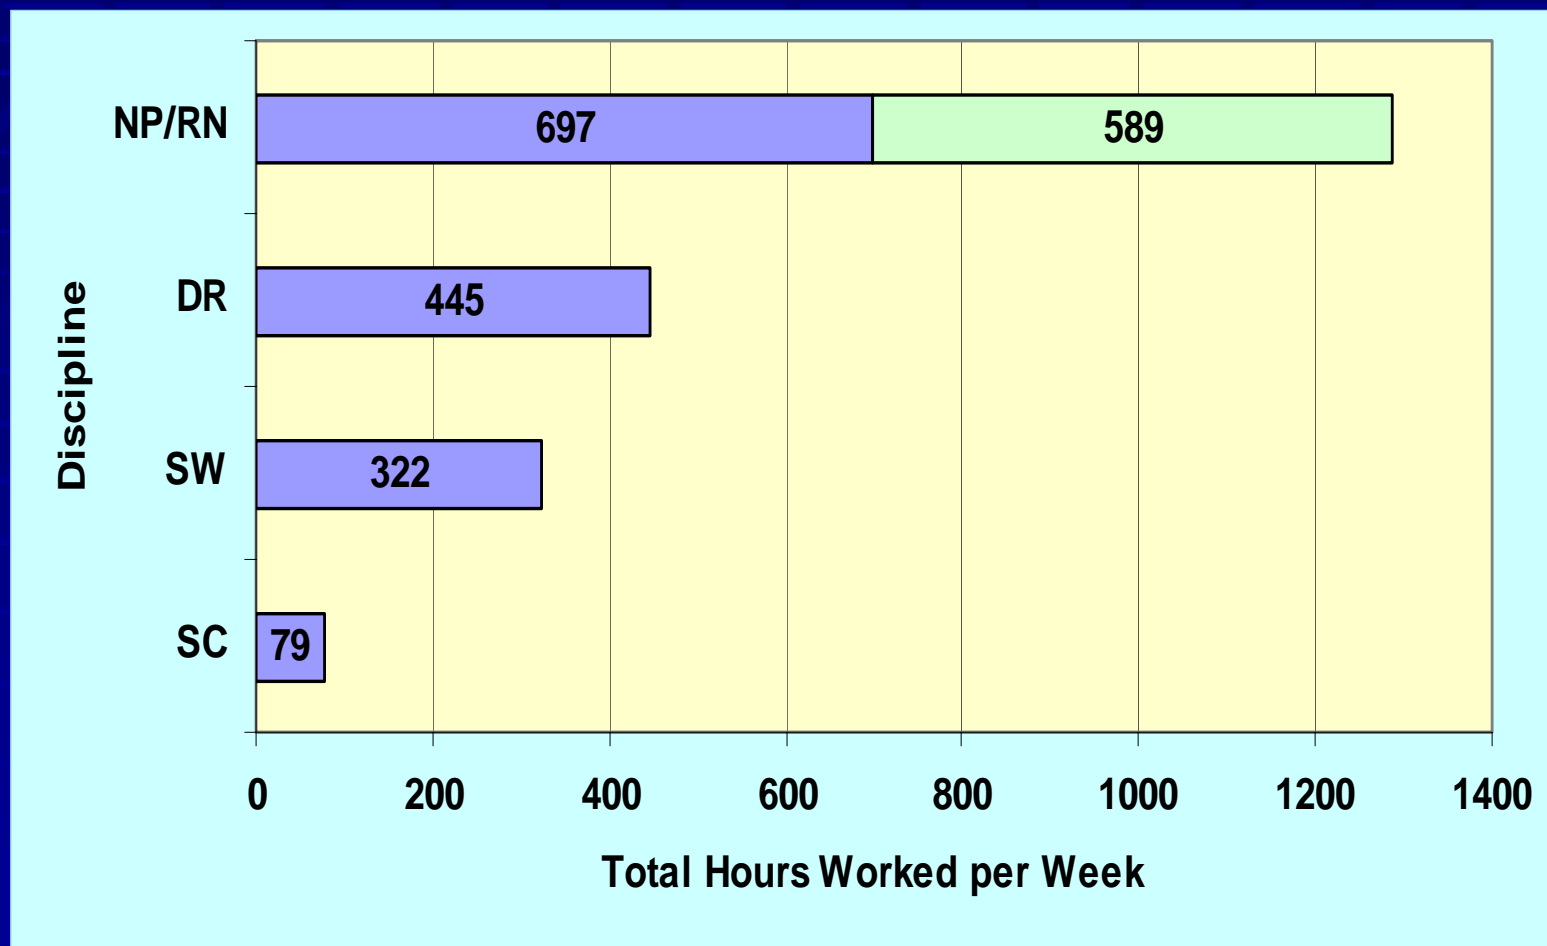

Most Common Reasons for Referral to Palliative Care Services

Core Palliative Care Team Disciplines

Total Weekly Hours by Discipline (n=21)

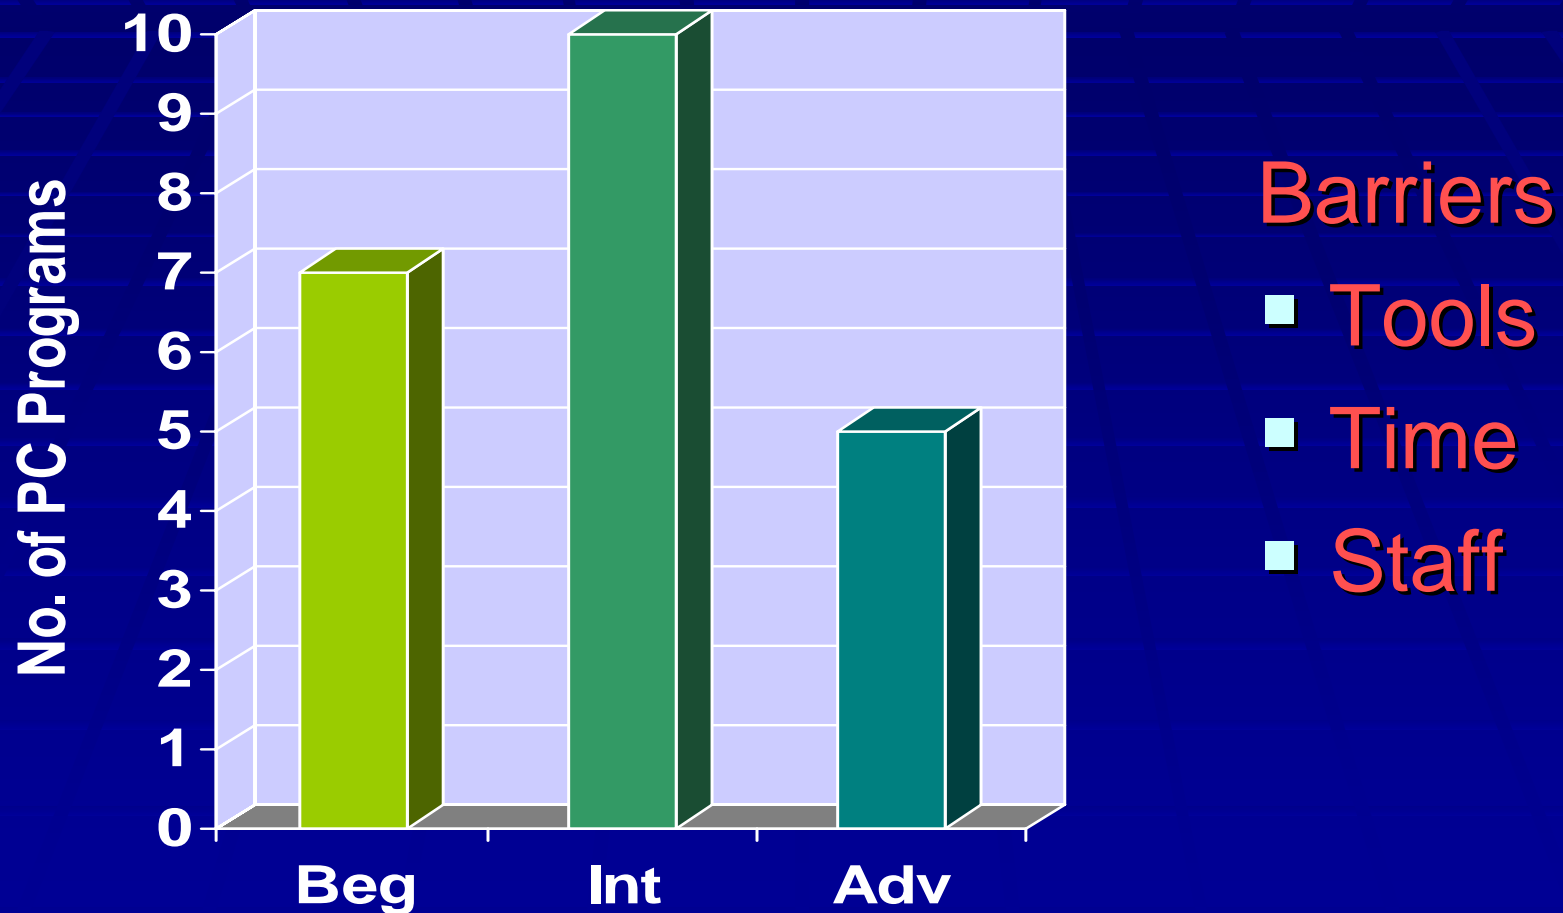

Palliative Care Credentials (n=22 teams)

17 teams Have DR board-certified in HPM (16)
or APN BC-PCM (5)

4 teams Have DR w EPEC training and RN
w EPEC or ELNEC training

1 team Has DR (hospice medical director,
not board-certified) and APN

State of Data Collection Efforts (n=22)

PC Indicators Tracked (n=22 programs)

Referrals (21)

- Number (21)
- Sources (19)
- Reasons (17)

Primary dx (20)

Change in pain score (6)

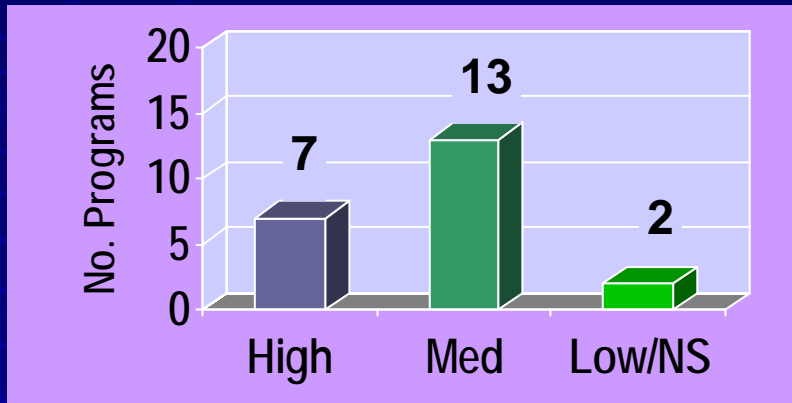

Discharge disposition (18)

- DC setting, services (15)
- No. DC'd to hospice (18)

Cost savings (10)

- Savings per PC patient (9)
- Annual savings for PC service (9)
- Both (8)

Impact of PC on Hospital Culture (n=22)

- Fewer ethics consults
- Reduced ICU LOS
- Fewer ICU deaths
- Increased staff comfort w EOL care & conversations
- Improved care of seriously ill patients
- Family satisfaction
- Earlier PC referrals
- More hospice referrals

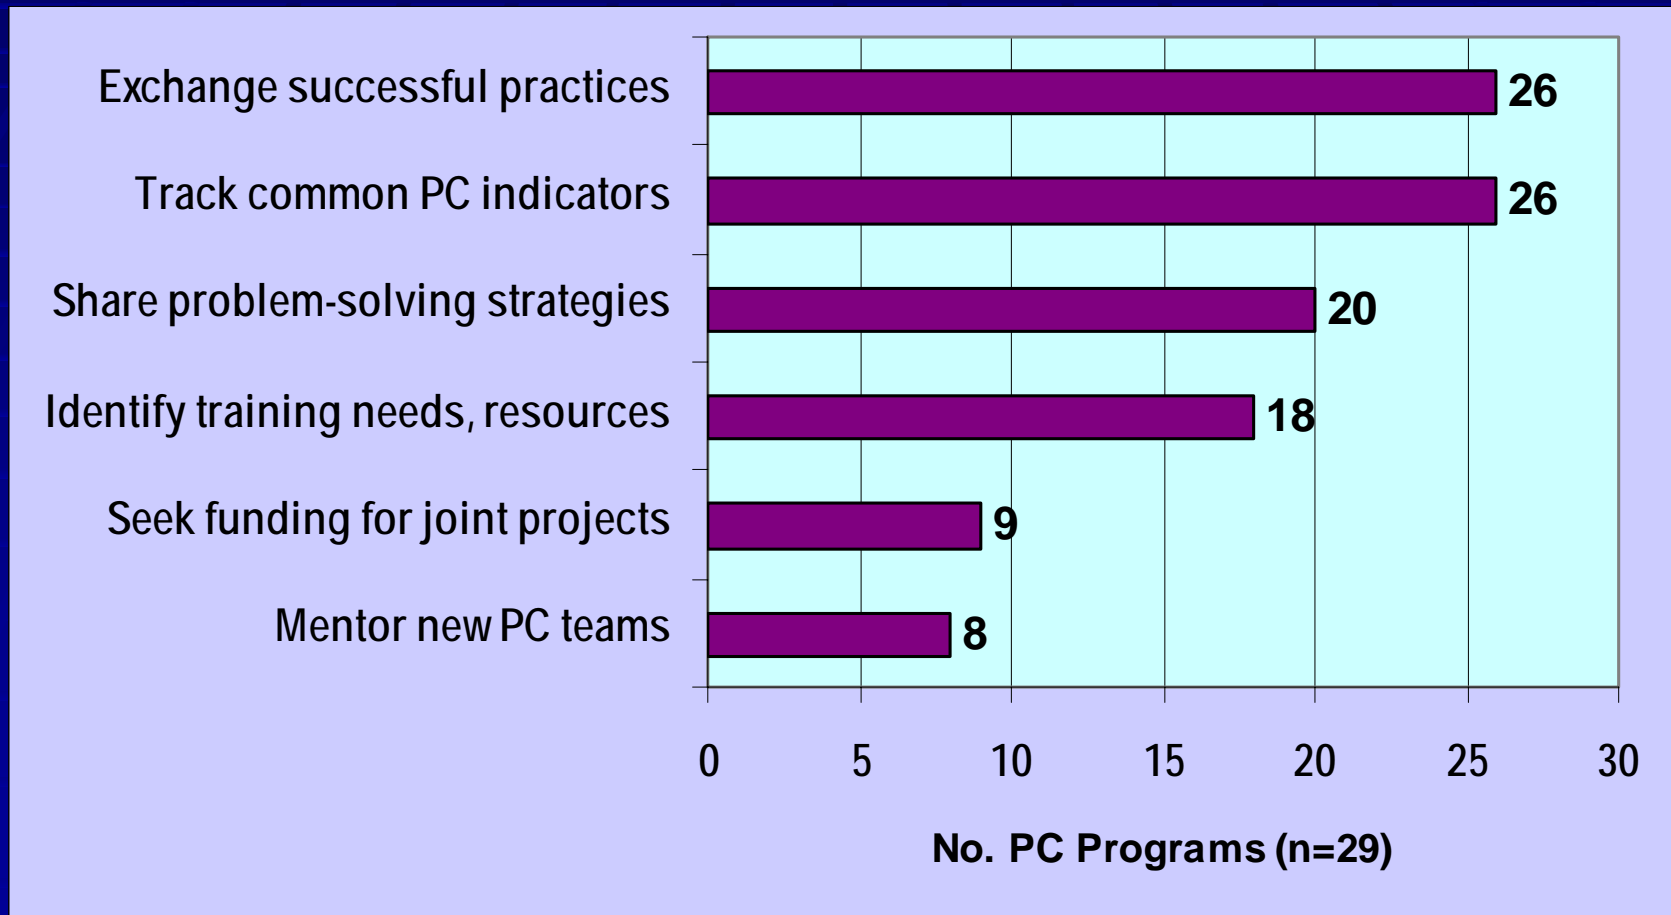

What are the primary challenges that your palliative care service faces?

Physician buy-in (8)
Cultivating referrals (7)
Financial support (7)
Qualified drs, staff (7)

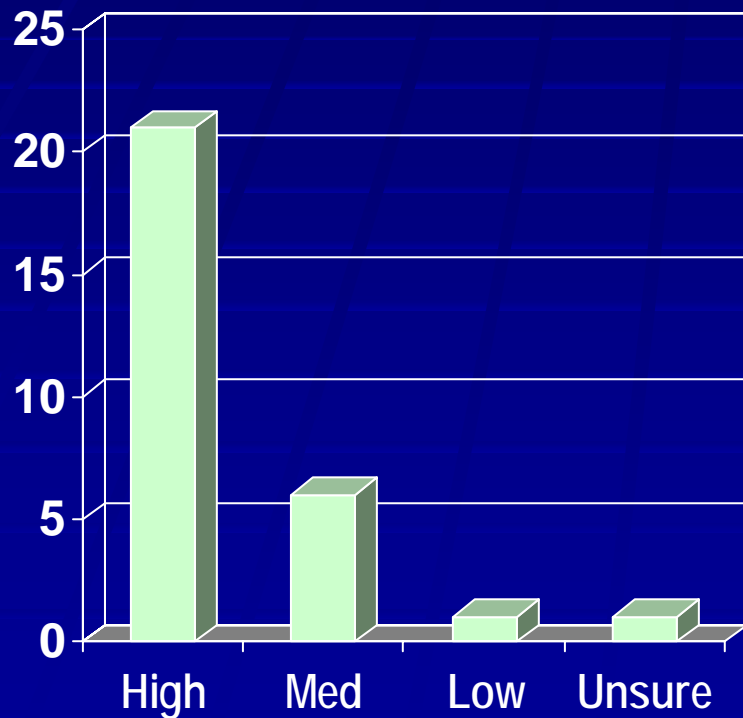

(n=26)

Interest in PC Networking Activities

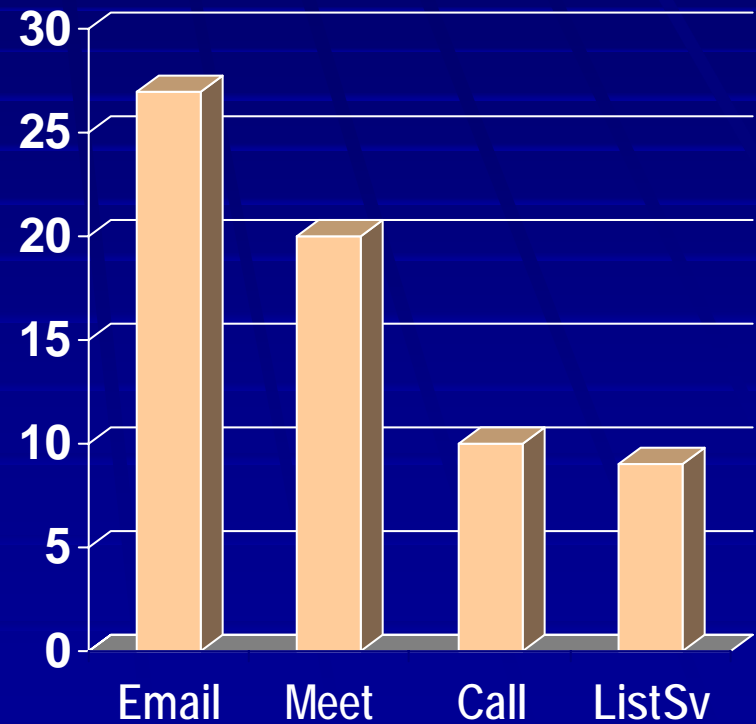

Interest in Networking (n=29)

Interest in PC Network
