

**QI File Formats (FY13)**

The CMHSP QI records submitted by the PIHPs must be submitted in a file with a header and trailer. The following three tables define the layout of the header record, the QI records, and the trailer record for each QI file.

**QI Header Record Format**

The QI file header is a single fixed-format record in the QI file that provides the system with required submission detail.

Note: Any errors on the HDDR or TRLR record will cause the entire file to reject and be returned to the appropriate submitter via the Data Exchange Gateway (DEG).

**QI Header Format**

Field Name	Type	Size	Begin	End	Comments
EDI TYPE	Text	4	1	4	“HDDR”
EDI APP	Text	2	5	6	“MA”
EDI User:					
EDI User - prefix	Text	5	7	11	“DCH00” (DCH zero zero)
EDI User - CA ID	Text	2	12	13	Service Bureau ID (Submitter ID)
EDI User - suffix	Text	1	14	14	Blank
EDI CREATION DATE	Text	8	15	22	YYYYMMDD
EDI TRANSFER DATE	Text	8	23	30	YYYYMMDD
EDI TRANSFER TIME	Text	4	31	34	HHMM
EDI FILE NAME	Text	4	35	38	“5218”
EDI RUN TYPE	Text	1	39	39	“P” for production or “T” for test
EDI BATCH IDENTIFIER	Text	3	40	42	<u>Unique</u> batch identifier assigned by PIHP
FILLER	Text	281	43	323	

**QI Input File Format**

The QI file data are ASCII asterisk (“\*”) delimited records that provide detail on each service recipient. Use an \* for the element delimiter and ~ for end of record delimiters.

Valid values for each QI element are found in the “Reporting Requirements” that are part of the contract and sent to the PIHP/CMHSP Executive Director.

**QI Input File Format**

FILLER	Text	291	33	323	

## **QI Data Submission Process**

QI data submitted in the ASCII delimited format will be submitted through the MDCH DEG on a monthly basis. The QI data will be year-to-date data as described above. It is important to note that because the QI data is processed by the State of Michigan's Data Warehouse and once processed is sent to the CHAMPS system. Because of this QI data must be processed by the Data Warehouse and posted to CHAMPS prior to any associated encounter data being processed. Failure of the QI data file being processed and posted to CHAMPS prior to the encounter file being submitted to CHAMPS will result in rejection of encounter claims. Since successful processing of an 837 encounter is dependent on successful processing of the QI file, the PIHP should submit the QI files at least 2 days prior to submitting Encounter files.

PIHPs Should copy transferred files immediately as a backup for their site. It is the agent's responsibility to retain backup files until the party at the final destination has verified and backed up the files. Should the file not be received in its entirety, it may have to be resent using the backup.

## **QI Record Processing**

Error conditions detected by the edit process are reported in a 4956 Error Return File. The Error Return File will be available to the PIHPs at their mailbox through the DEG. The report will advise of the status of the records submitted in a particular file. If the records result in any errors being identified in the editing process, the report will specify the records that contain errors and the nature of the errors.

A complete list of the Data Warehouse QI edits that are reported in the 4956 Error Return File can be found in the "**QI Error Listing**". The QI error listing will be posted on the MDCH website.

All Error Return Files will reference the data submission number. The PIHP will need to be aware of its data submission number and basic information about the submission.
