

Michigan Worksite Wellness Providers

This list was created as a resource for organizations looking for outside assistance for their employee wellness programs. Only worksite wellness providers who are able to document that they have delivered services to multiple worksites over the past two years *using their own staff at least 75% of the time* will appear on the provider list. Appearing on the provider list does not constitute endorsement or recommendation by the Michigan Department of Community Health (MDCH).

The list is intended only as resource. You are encouraged to evaluate and chose the provider best suited for your wellness needs.
