

Bay-Arenac Behavioral Health's Health Integration Project

Program Description

Bay-Arenac Behavioral Health (BABH) offers Health Integration services to individuals receiving outpatient, case management, or ACT services through the Bay and Arenac County offices. Access is by referral from the mental health case manager for persons who meet specific morbidity risk factors. Qualified individuals will receive enhanced nursing and physician office liaison services along with other support services identified within their individual person centered plan. The primary service population will be persons with high behavioral health and physical health needs.

Individualized Health Integration

We're identifying people who are currently in our system with certain medical risk factors and for new people we are including it in our intake assessment process

Referral Process

Risk Factors*

Reason(s) for Referral

BAY-ARENAC BEHAVIORAL HEALTH
REFERRAL FORM TO THE HEALTH INTEGRATION PROGRAM
NURSE FOR THE HEALTH INTEGRATION PROGRAM

Consumer Name _____ MR# _____ Date _____

Primary Care Coordinator _____ Program Nurse _____

Primary Care Practitioner _____ Psychiatrist _____

When a consumer has been assessed for a potential referral to the Health Integration Program Nurse, they will have met at least 3 of the following risk health related concerns (check off the areas of concern) and have a history of Severe Mental Illness (SMI), Serious Emotional Disturbance (SED) or Developmental Disability (DD). These findings will be based upon a completed health screening and/or a nursing health care assessment.

RISK FACTORS (Check at least 3):

- Addiction to nicotine
- Diabetes (insulin dependent or non-insulin dependent)
- Overweight
- Blood pressure concerns
- Abnormal cholesterol levels
- Abnormal triglyceride levels
- Long term psychotropic medication use
- COPD
- Heart Attack
- Stroke
- Other: _____

REASON FOR REFERRAL (Check all that apply):

- Needs Primary Care Practitioner
- Body systems compromised (heart, lungs, kidneys, etc.)
- Many health issues/concerns
- Needs further testing
- Needs consultation
- Requires additional education
- Other: _____

If at any time, there is a concern or question regarding a possible referral, a consult by the Health Integration Program Nurse for potential referral may be requested. At that time, the Health Integration Program Nurse will make the determination for acceptance into the Health Integration Program.

Signature/Credentials _____ Date _____

5/10 1

Enhanced Project Staff

Peer Lead Whole Health Grant (TTI) funded Full-time Certified Peer Support Specialist

- PATH Workshop Facilitation
- Education and Wellness groups
- Involvement in person centered planning process

Full-time Health Integration nurse

- Completes nursing health care assessment
- Completes metabolic assessment
- Wellness education for individuals
- Outreach to primary care physicians (and community)
- Staff education

Projected Outcomes

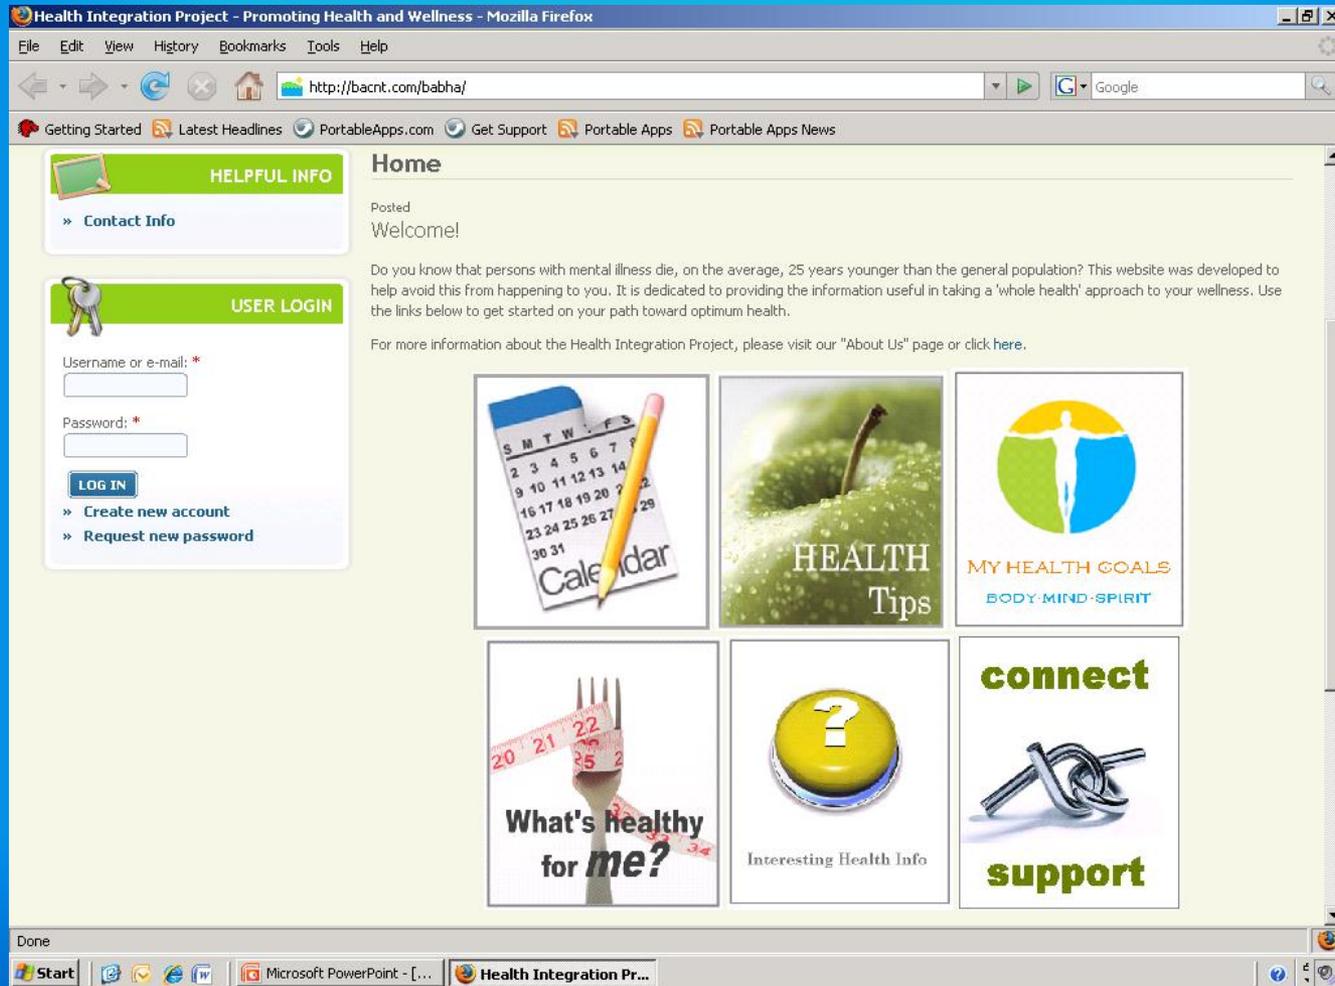

- ❑ Educate Population on Health Risks & Options
 - Target Providers, Families and Clients
 - Focus on Prevention and Wellness
- ❑ Identify individuals in Bay & Arenac Counties who wish to improve their health
- ❑ Implement established standards of care
 - Prevention, Screening and Treatment
- ❑ Improve access to and integration of physical and mental health care

Sustainability and Replication

- A change in clinical practice
- All individualized health services will remain in place
- All group health services will remain in place
- The systematic change will eliminate the difficulty in obtaining baseline medical information
- The systematic change will assure all eligible new consumers are aware of available services
- The systematic change will provide persons served with a medically trained whole health resource
- An interactive health website will provide ready access to all materials and resources that were developed/identified under the project, and provide a valuable ongoing resource to consumers

Resources also made available to those who do not qualify for HIP services

Welcome!

Do you know that persons with mental illness die, on the average, 25 years younger than the general population? This website was developed to help avoid this from happening to you. It is dedicated to providing the information useful in taking a 'whole health' approach to your wellness. Use the links below to get started on your path toward optimum health.
