Practical Tips

NOTE to Reader:

The **Assessment Coordinator Training Guide** is comprised of a series of documents published by the Michigan Department of Education (MDE) to provide information to District and Building Assessment Coordinators regarding their assessment-related roles and responsibilities. This guide provides the resources and knowledge base necessary to establish sound test administration practices and procedures that will allow for the reporting of valid and reliable test results. It will introduce you to Michigan's state assessment systems in general and will link you to the people, trainings, materials, tools, and resources needed throughout the process of coordinating state-provided assessments in your district.

This document is one chapter of the **Assessment Coordinator Training Guide** series. The **Assessment Coordinator Training Guide** is not meant to replace assessment-specific testing manuals, guides, training resources, or other documentation associated with each assessment program.

The web pages referenced in this document are active links. For the full URLs to these pages, please see the **Assessment Coordinator Training Guide Quick Reference** chapter. In that resource you will find an interactive list, along with the full URLs, of the assessment-related web pages you will need to access, as well as:

- A preface for the **Assessment Coordinator Training Guide**, which includes information on how to use the guide
 - An interactive **Table of Contents** for the training guide
 - A reference list of acronym definitions, and
 - Important contact information

It is recommended that you keep the **Assessment Coordinator Quick Reference** readily available for future use.

Intro

The **Accountable Students Enrolled and Demographics** page in the **Office of Educational Assessment and Accountability (OEAA) Secure Site** provides reports that allow schools to verify the student enrollment and demographic information that will be used in assessment and accountability reporting. The student enrollment and demographics are pulled from the **Michigan Student Data System (MSDS)** and updated on the Secure Site twice a day to accommodate ongoing changes to the MSDS. This chapter includes information on the Accountable Students Enrolled and Demographics page, as well as the type of reports available and how to read them, by answering the following questions:

- ▶ What is the Accountable Students Enrolled and Demographics page?
- ▶ What type of reports are available on the Accountable Students Enrolled and Demographics screen?
- ▶ What do I look for on the Accountable Students Enrolled and Demographics report?
- ▶ Why is it important to review the Accountable Students Enrolled and Demographics report?

What is the Accountable Students Enrolled and Demographics page?

A public school's report on the **Accountable Students Enrolled and Demographics** page of the OEAA Secure Site lists names and demographic information for all students whose MSDS record lists the school as their **Primary Educational Providing Entity (PEPE)**. This does not apply to nonpublic schools. The data pulled from MSDS is based on the Fall MSDS General Collection (October student count day), the Spring MSDS General Collection (February student count day), and student record maintenance (SRM) files that have been submitted in MSDS. The data is updated twice a day to accommodate new SRM submissions.

Assessment Coordinators should review the **Accountable Students Enrolled and Demographics** reports when they become available in April to check the accuracy of the data. During this review on the Secure Site, districts can continue to submit Student Record Maintenance (SRM) files in the MSDS to update student enrollment and demographics before the final assessment and accountability reporting.

OEAA will post a deadline for making MSDS updates in time for annual assessment and accountability

reporting. OEAA will also provide an "as of" date the SRM file must contain when it is submitted, to assure it is picked up for assessment and accountability reporting. This is very important, because any SRMs with an "as of" date occurring after the posted date will not be picked up by OEAA for annual assessment and accountability reporting. It is important to note that OEAA will NOT use the End-of-Year Collection for enrollment and student demographic purposes. The End-of-Year Collection is important for other school accountability and performance reports but is not used to determine enrollment or demographics for assessment reporting purposes.

Assessment coordinators will need to work closely with their districts' **authorized MSDS user(s)** to communicate the need for updating the MSDS, and to inform them of the "as of" date and the deadline for submission/certification of SRM files for assessment and accountability reporting. Only authorized user(s) can update the MSDS. If you do not know who your authorized MSDS user(s) is, you can look up the name and contact information on the **District and School Contacts** page of the [Secure Site](#).

Students in grades 3-8, 11, and required grade 12 students who were expected to take the SAT, PSAT 8/9 for grade 8, M-STEP, and/or MI-Access, will be listed under the “Spring” test period window.

The English Learners (EL) who were expected to take the WIDA ACCESS for ELLs or the WIDA Alternate ACCESS for ELLs in grades K-12 will be listed under the “Spring WIDA” test period and will be available separately from other spring assessments.

Currently, PSAT 8/9 for grade 9, PSAT 10, ACT WorkKeys, and Early Literacy and Mathematics Benchmark Assessments (K-2) are not used in accountability calculations, so the **Accountable Students Enrolled and Demographics** will not be available for these groups of students.

What type of reports are available on the Accountable Students Enrolled and Demographics screen?

There are two different type of reports on the **Accountable Students Enrolled and Demographics** page of the Secure Site.

1. **Accountable Student Groups** – this will give you a summary of subgroups by grade for the building or district, depending on which entity is selected. The links in the grade columns can be used to drill down to the individual students being assessed in that subgroup.

2. **Accountable Students Enrolled and Demographics** – this will give you a detailed list of students showing as enrolled in the building along with each student’s demographic information

Even after reviewing all the **Accountable Student Groups**, you will still need to view the complete list of students on the **Accountable Students Enrolled and Demographics** report.

The summary and student data from both reports can be downloaded into an Excel spreadsheet or printed.

What should I look for on the Accountable Students Enrolled and Demographics report?

When the reports are available on the Secure Site, you should verify the following information.

- » The totals for each of the subgroups by grade level are correct.
- » Students who were enrolled through the “as of” date announced by OEAA are listed. If a student is not listed but was enrolled, the district MSDS person may need to submit an enrollment record in MSDS for the student.
- » Students who exited the school prior to the “as of” date announced by OEAA are not listed. If a

student left the school, the district MSDS person will need to submit an exit record in MSDS for the student.

- » Nonpublic school students and homeschooled students who attend the school for a non-core class are not listed. If they are listed, the MSDS person may need to update the residency code for the student in MSDS.
 - Nonpublic school students’ residency codes in MSDS should be either 04 or 08.

- Homeschooled students' residency codes in MSDS should be either 07 or 15.
- » All student's demographic information is correct. If a correction needs to be made, the district MSDS person will need to update it in MSDS. A list of demographics used for assessment and

accountability reporting, along with how/when the information can be updated, is available in the full instructions for [Accountable Students Enrolled and Demographics](#) on the [Secure Site Training web page](#). under the [Accountable Students & Test Verification](#) section.

Why is it important to review the Accountable Students Enrolled and Demographics report?

It is very important that the reports are reviewed when they become available, and that any updates or corrections are made in the MSDS by the posted deadline, using the posted "as of" date. This is the school's last opportunity to ensure that the school enrollment and student demographics are updated for the final assessment and accountability reporting.

The OEAA Accountability staff will not accept appeals or adjustments to a school's enrollment or demographics after this process deadline.

Watch the weekly [Spotlight on Student Assessment and Accountability](#) for information on the Accountable Students Enrolled and Demographics starting in April of each year.

Full instructions on reviewing the [Accountable Students Enrolled and Demographics](#) can be found on the [Secure Site Training web page](#) under the [Accountable Students & Test Verification](#) section.

Practical Tips/Summary

- When reviewing the data in the Accountable Students Enrolled and Demographics page, don't forget to use the column filters to customize your reports, to help with reviewing the full list of enrolled students.
- You do not need to wait until the Accountable Students Enrolled and Demographics reports are available on the Secure Site. You can work with your authorized district MSDS person to obtain reports from MSDS to verify student enrollment and demographics throughout the school year as needed. Student information in the Student Information System can be different than what is in MSDS.
- » Student information can be updated throughout the year in MSDS; districts do not need to wait until the Accountable Students Enrolled and Demographics reports are available in the Secure Site.
- Work with your district's **authorized district MSDS** person to set up a plan on how you will communicate with one another, as well as to develop the process to keep student information updated after the spring MSDS general collection. This will ensure accurate student enrollment and demographics for assessment and accountability reporting.
