BACKGROUND

The Perkins Act of 2006 requires that states establish and support performance accountability systems that can assess the effectiveness of the state and local funding recipients in Career and Technical Education (CTE). The state-developed performance measures consist of core indicators, any additional indicators that the state determines, and the “state adjusted levels of performance” for the indicators.¹

This document provides information regarding the performance of Region 10 on eight Core Performance Indicators (CPIs) at the secondary level. The eight CPIs in Michigan are 1S1–Academic Attainment in Reading, 1S2–Academic Attainment in Mathematics, 2S1–Technical Skill Attainment, 3S1–School Completion, 4S1–Student Graduation Rate, 5S1–Placement, 6S1–Nontraditional Participation, and 6S2–Nontraditional Completion. Definitions for the eight CPIs are available at

<http://www.cteisreports.com/ReferenceMaterials/Michigan%20Agreed%20Upon%20Performance%20Levels%202015-2016.pdf>.

A graph associated with each CPI for Region 10 is provided in the Appendix and depicts data on the CPI for seven years (2008-2009, 2009-2010, 2010-2011, 2011-2012, 2012-2013, 2013-2014, and 2014-2015). The green column in each graph shows the percentage scored by Region 10 on the CPI, the gray column shows the overall statewide percentage on the CPI, and the black square dots indicate the yearly State accepted target for the CPI. Green or gray columns below the black square dot for a particular year indicate that the Region or State did not meet the State accepted target for that particular CPI in the given year. Similarly, green or gray columns above the black square dot for a particular year indicate that the Region or State met/exceeded the State accepted target for that particular CPI in the given year.

PURPOSE

The intent of this document is to serve as a tool for CTE administrators to use in determining what CPI strategies are working or not working within their Region and Career Education Planning District (CEPD). Furthermore sharing of information in this document with CTE teachers and other relevant personnel within the Region may help stimulate discussion on how to improve Regional performance on individual CPIs.
