## Questions and Answers

**Question:** My building principals are requesting a list of the free and reduced-price students for their buildings. Is there a reason why the principal would need to know who the students specifically are?

**Answer:** In addition to being authorized to receive information, those requesting eligibility information must have a “need to know” which refers to persons determined to be “directly connected” with the administration or enforcement of a federal education program. For instance, while federal education programs are authorized, not all persons administering an education program in the school district need to access information (e.g., teachers, principals, or guidance counselors). State and local agencies must ensure that persons receiving a child’s free and reduced-price eligibility information have a legitimate need to know. Additional information regarding confidentiality and disclosure requirements can be found in the Eligibility Manual for School Meals starting on page 83.

---

**Question:** My PTA wants a list of eligible students to provide holiday baskets or angel tree donations. Can I provide the names?

**Answer:** No. The Sharing Information form could be provided to families to inquire if they are interested in receiving a donation from the school. If the parent or guardian gives permission to share the information, you can provide those names.
