

Michigan Profile for Healthy Youth

Script for Survey Administrator

Good morning/afternoon. The Michigan Departments of Education and Community Health are conducting this student survey called the Michigan Profile for Healthy Youth. Survey results will help schools and communities learn what kids need to make healthy choices and experience success.

Participating in this survey is voluntary and your grade in this class will not be affected, whether or not you answer the questions. However, only a limited number of students like yourself are participating in this survey in schools all over Michigan. The answers you give are very important. I ask that you read each question carefully and answer it based on what you really think or do.

Your answers are private. Don't pick a response just because you think that's what someone wants you to say. Results of this survey will never be reported by name or class. No one will know your identity, discover who you are, or how you answer the questions.

A web-based survey is different than the paper and pencil surveys that you may be used to. As in any survey, you may leave any question blank that you do not feel comfortable answering. If you want to change an answer, simply select another option. Make sure you check all your answers before continuing to the next page. Once you hit the continue button at the bottom of the screen, you cannot change your answers. Please raise your hand if you have a problem with your computer.

At the end of the survey, please follow your teacher's instructions on what to do when you are finished. Please remember that others may be finishing the survey and remain quiet.

Thank you for participating. You may begin.
