

2017 Initiative PCMH Initiative Participation Recommendation

APPLICATIONS RECEIVED:

- **486** practices units applied for the PCMH Initiative
- **2,444** individual providers were represented in those practice unit applications
- **31** applications were received from a physician organizations (on behalf of multiple practice units / providers)
- **51** applications were received from individual practice units

SELECTION PROCESS STEPS:

Location

20 practices were not in an eligible location and were not previous MiPCT participants.

PCMH Designation

14 practices did not have PCMH recognition/accreditation.

Electronic Health Record

8 practices did not have an ONC certified electronic health record.

Registry

4 practices did not have a registry.

Care Management Documentation

3 practices did not have a tool to document care management and coordination services.

Minimum Beneficiary Count

82 practices did not have a minimum of 100 attributed Medicaid beneficiaries.

SELECTION PROCESS RESULTS:

131 unduplicated practices were excluded from participation based on the process above.

333 unduplicated practices are recommended for participation in the 2017 PCMH Initiative. **2,039** individual primary care providers work in those practice units. The practices/providers recommended for participation serve **315,358** Medicaid beneficiaries.

24 unduplicated practices are provisionally recommended for PCMH Initiative participation, contingent upon the confirmation of one or more application details. **74** individual primary care providers work in practice units provisionally recommended for participation. The practices/providers provisionally recommended for participation serve **31,383** Medicaid beneficiaries

Counting both accepted and provisionally accepted practices, a total of **355** practice units, **2,118** providers and **344,867** Medicaid beneficiaries are recommended for participation in the 2017 PCMH Initiative.

238 of the **355** practice units accepted and provisionally accepted (approximately 67%) are current MiPCT participants.

Geographically, **58%** of accepted and provisionally accepted practices are located in a SIM test region (representing **54%** of accepted beneficiaries).

2017 Initiative PCMH Initiative Participation Recommendation
